

WELCOME TO THE COMMERCIAL RANGE

Here are some of your new air conditioner's major features.
Panasonic has developed an impressive range of highly efficient Commercial Air Conditioners. This range confirms our commitment to the environment. Our Inverter compressors optimise performance.

HIGHLIGHTED FEATURES

PACi: Commercial air to air. The full solution for shops, restaurants, offices or residential applications with high efficiency and compact in size.

Commercial benefits

Great savings and improved wellness.

Panasonic has developed an impressive range of highly efficient Commercial Air Conditioners. Our Inverter compressors optimise performance.

A wide range for the commerce, office or residence.

From the smaller 1x1 to the more complete 4x1 solutions, it doesn't

matter which your need is. Panasonic can offers you the best solution to get the best clima.

High connectivity.

The control systems allows you to have complete control of all your installations. All your units from several locations, receive status updates in real-time, preventing breakdowns and optimizing costs.

Energy saving

Intelligent Human Activity Sensor and Sunlight Sensor technologies that can detect and reduce waste of energy by optimising air conditioner operation according to room conditions. With just one touch of a button, you can save energy.

Exceptional Seasonal Cooling Efficiency based on the new ErP regulation. Higher SEER ratings mean greater efficiency. Save all the year while cooling!

Exceptional Seasonal Heating Efficiency based on the new ErP regulation. Higher SCOP ratings mean greater efficiency. Save all the year while heating!

Inverter Plus System classification highlight the Panasonic highest performing systems.

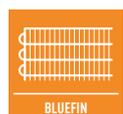

Wider operation Hz range of compressor realize more high efficient operation through the year. For Big PACi Series PEZ.

Our heat pumps containing the new refrigerant R32 show a drastic reduction in the value of Global Warming Potential (GWP). An important step to reduce greenhouse gases. R32 is also a components refrigerant, making it easy to recycle.

High performance

Panasonic has extended the life of its condensers with an original anti-rust coating. For Big PACi Series PEZ.

Big size Fan makes larger airflow rate and very silent operation at low speed. For Big PACi Series PEZ.

DC Fan: Save and precise.

The air conditioner works in cooling mode with an outdoor temperature of -15°C.

The air conditioner works in heat pump mode even when outdoor temperatures are as low as -20°C or -15°C.

The Panasonic renewal system allows good quality existing R410A or R22 pipe work to be re-used whilst installing new high efficiency R32 systems.

The Panasonic renewal system allows good quality existing R22 pipe work to be re-used whilst installing new high efficiency R410A systems.

5 years warranty. We guarantee the outdoor unit compressors in the entire range for five years.

High connectivity

The AC Smart Cloud from Panasonic allows you to have complete control of all your installations. In a simple click, all your units from several locations, receive status updates in real-time of all your installations, preventing breakdowns and optimizing costs.

Internet Control is a next generation system providing a user-friendly remote control of air conditioning or heat pump units from everywhere, using a simple Android or iOS smartphone, tablet or PC via internet.

The communication port is integrated into the indoor unit and provides easy connection to, and control of, your Panasonic heat pump to your home or building management system.

PACi OUTDOOR UNITS ENERGY SAVING CONCEPT

Product quality and safety. All Panasonic air conditioners undergo strict quality and safety tests before sale. This rigorous process includes obtaining all necessary safety approvals, to ensure that all air conditioners we sell are not only built to the highest market standards, but are also completely safe.

New PACi R32 Refrigerant Gas

Panasonic recommended R32 because it is comparably environmentally friendly. Compared to R22 and R410A, R32 has a very low potential impact on the depletion of ozone layer and global warming.

In line with the European Countries who are concerned in protecting and maintaining the environment by participating in the Montreal Protocol to rectify one of its program in protecting the Ozone Layer and preventing Global Warming, Panasonic is leading the switch to R32.

PACi Elite: Newly designed next generation of commercial air conditioning

Outstanding performance at low temperatures, high energy efficiency, power consumption in remote control display. Energy-saving concept. The use of energy saving design for the structure of fans, fan motors, compressors and heat exchangers resulted in high COP value which ranked as one the top class in the industry. CO₂ emissions through reduced energy consumption and lowers operating costs.

PACi Elite. From 3,6 to 25,0kW.

- Meeting all necessary safety approvals to ensure quality and safety
- Top-class SEER: A++ / SCOP: A++ at 10,0kW (in 90x90 Cassette)
- Cooling operation is possible when outdoor temperature as high as 46°C
- DC inverter technology combined with R410A
- Cooling operation is possible when outdoor temperature as low as -15°C
- Heating operation is possible when outdoor temperature as low as -20°C
- Compact outdoor units
- Auto restart from outdoor unit
- Twin, Triple and Doble-Twin connection possible

Panasonic Mini PACi Series PE2

Outdoor PACi Elite from 3,6kW to 6,0kW and PACi Standard 6,0kW to 7,1kW, all made in Japan.

Fully new outdoor design with last generation compressor. Higher performance and better partial load. Includes control consumption, 0-10V demand control and all latest remote controller's functionalities.

High efficiency:

- New heat exchanger
- New and bigger fan
- New Panasonic Compressor
- New chassis

1. Installation innovation.

- Extremely easy to install, practically the same as for the R410A. (Just remember to verify that the pressure gauge and vacuum pump are compatible with the R32)
- This refrigerant is 100% pure, which makes it easier to recycle and reuse

2. Environmental innovation.

- Zero impact on the ozone layer
- 75% less impact on global warming

3. Economic and energy consumption innovation.

- Lower cost and greater savings
- Higher energy efficiency than R410A

PACi Standard: For economy and value

With high quality design and engineering, the PACi Standard is the perfect solution for projects which demand quality on a limited budget. In addition, its compact size and light weight make it ideal for installations with limited space including small commercial and residential applications.

The outdoor unit is much more compact than the previous model. The slim and lightweight design means the PACi outdoor unit can be installed in a number of situations. On the 12,5kW (996x940x340mm).

PACi Standard. From 6,0 to 14,0kW.

- Good balance, system cost vs energy efficiency
- Top class SEER/SCOP as a Standard Inverter category SEER: A++ / SCOP: A+ at 10,0kW (in 90x90 Cassette)
- Interchangeable controller with ECOi
- Compact outdoor units
- Twin connection possible
- Cooling operation up to -10°C
- Heating operation up to -15°C

Big PACi Elite. Trusted power and high efficiency

PACi 8 and 10HP are designed to adapt to current and most demanding commercial needs. Ready to connect to 1 big ducted indoor unit up to 4 indoor units.

Large capacity PACi Elite:

- High efficiency
- Better partial load (10% ~ 100%)
- More flexible piping
- Bluefin anti-rust coating
- 0-10V control demand
- Energy saving functions
- AHU connection kit
- From 1 to 4 indoor units

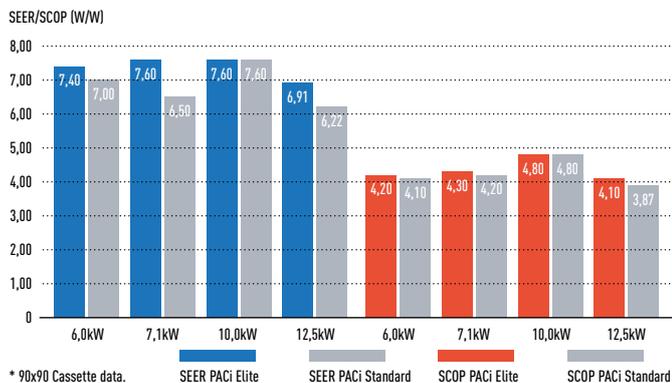

PACi ELITE: EXCELLENT SEER AND SCOP VALUES

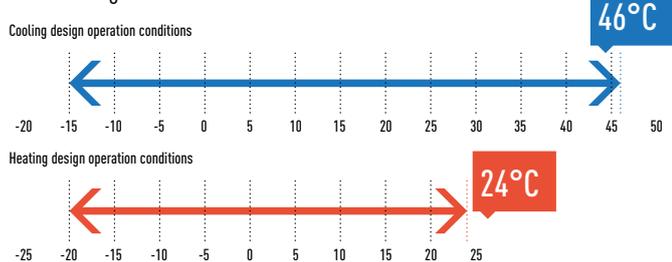

High operating efficiency using DC inverter compressor, DC motor and a heat exchanger design.

Seasonal efficiency for daily energy saving

Design operation conditions

Cooling operation is possible when outdoor temperature as low as -15°C or as high as 46°C. Heating operation is possible when outdoor temperature as low as -20°C. The remote control temperature setting offers a range from 18°C to 30°C.

Energy consumption monitoring display with the CZ-RTC5B

Menu selection: 3 types (Day/Week/Year) of display are available.

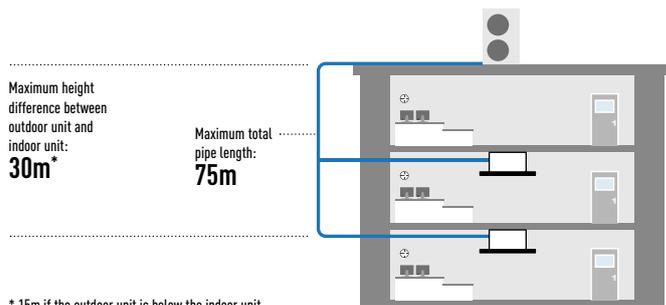

Daily Energy consumption: Data is shown with Yesterday's record. (Graph starts from 0 o'clock to 24 o'clock only.)

Weekly Energy consumption: Power consumption of each day of the week can be checked.

Annual Energy consumption: Power consumption of each month can be checked.

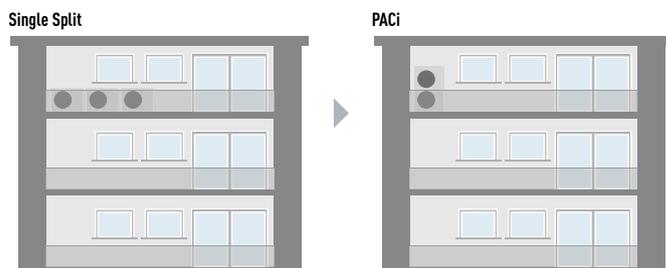

Increased piping length for greater design flexibility

Adaptable to various building types and sizes. Maximum piping length: 75m (10.0, 12.5, 14.0kW). 50m (6.0, 7.1kW).

Compact & Flexible-design

The slim and lightweight design means the PACi outdoor unit can be installed in a number of compact situations. As the unit only weighs 98kg, it is easy to carry and easy to install.

New datanavi, a new way to connect. Simple and easy support tool with your smartphone.

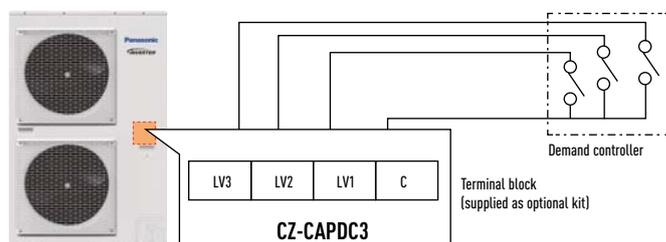

Demand response compliant (CZ-CAPDC3) as a standard function

This terminal allows demand control of the outdoor unit. Several level of settings are available:

- Level-1, 2, 3 : 75 / 50 / 0 %
- Level-1, 2 can be set in 40 - 100% (40, 45, 50...95, 100: each 5%)

Demand control terminal is available to control 0-50-75% of capacities. CZ-CAPDC3 is an optional for R410A models.

SOLUTIONS FOR SERVER ROOMS

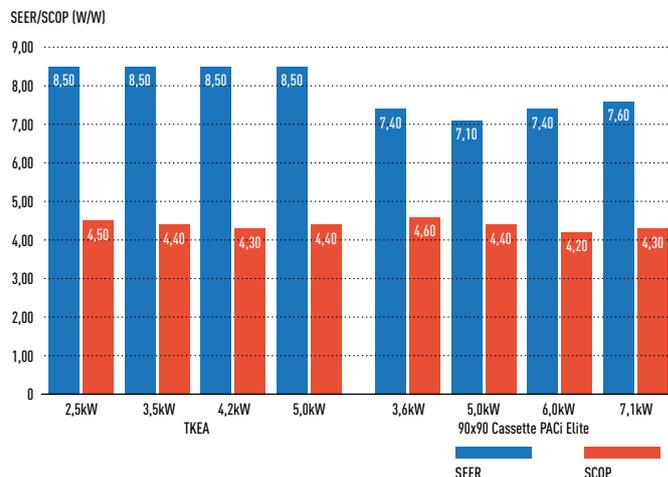

High efficiency products for 24/7 applications. Panasonic has developed a complete range of solutions for server rooms which efficiently protect your servers, keeping them at an appropriate temperature even when the outdoor temperature is below -20°C.

High efficiency all the year

Key points:

- **NEW!** From 2,5 to 7,1kW with new TKEA R32 gas units A+++ in cooling
- PACi units from 3,6 to 14kW
- Backup function
- Redundancy function
- Alternative run function
- Error information by dry contact
- Operation even at -20°C outdoor temperature
- High seasonal performance
- Product design for 24/7 operation

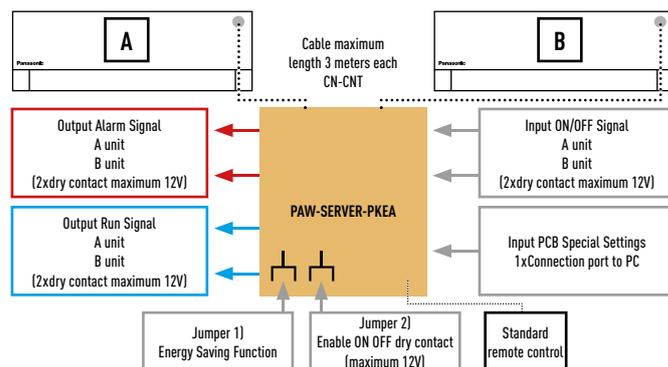

Interface to run 2 TKEA/PKEA. PAW-SERVER-PKEA

The PAW-SERVER-PKEA server room interface manages redundancy and backup of two TKEA/PKEA units with two different selectable modes:

- Plug and play by embedded redundancy and backup algorithm (no external signal needed. Further details please refer to operation manual)
- External (third party PLC) redundancy and backup management by dry contact

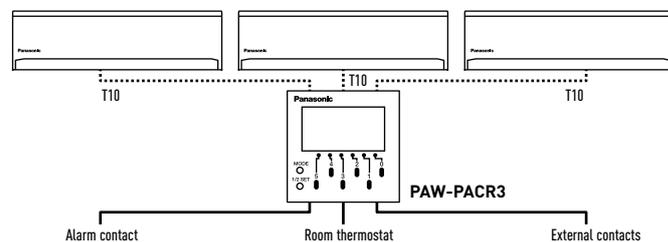

All settings are possible without the need for a computer connection. A special Energy Saving Mode is selectable by deep switch (available only in plug and play mode). The level of remote control input prohibition can be set when external management is by dry contact.

Interfaces to run 2 or up to 3 PACi and VRF Range

PAW-PACR3.

In combination with one PAW-T10V on each indoor unit, allows the redundant operation of 2 (or 3) PACi or VRF indoor units. All units will be operated by programmable turns in order to achieve the same operating time (example turn every 8 hours with 24 hours). If the room temperature exceeds a freely set value, the 2nd (or 3rd) unit will be switched ON and an alarm will be activated.

- Display and Settings:**
- Possible to select next unit manually
 - Possible to reset operation
 - LED display shows operation status of the 2 or 3 units
 - Operation status output
 - Alarm LED and alarm output
 - Temperature limit can be set
 - Temperature hysteresis can be set
 - Room temperature is displayed
 - Time counter displayed

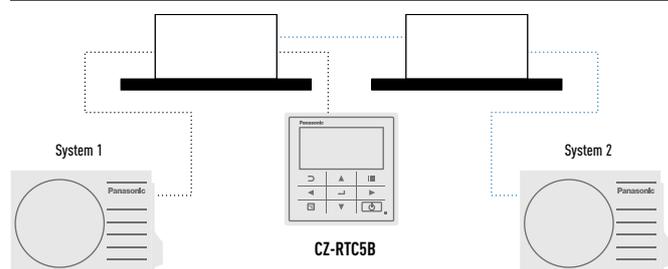

Backup control by using. CZ-RTC5B.

Group wiring of 2 systems of PACi can do auto individual control.

- Rotation operation
- Backup operation
- Support operation

CZ-CAPRA1.

Domestic with CZ-CNT port integration to PACi and ECOi.

GENERATION PACi 90x90 CASSETTE

Panasonic introduces new flat panel design which is modern and matching well with your space. These cassettes have developed to satisfy today's customer needs such as high energy saving, comfort and healthier air.

PACi Cassette Panasonic

- Better SCOP & SEER (up to 15%)
- Advanced comfort and energy saving by Econavi sensor
- Air purification nanoe™ X system
- Super quiet operation from 28dB(A)

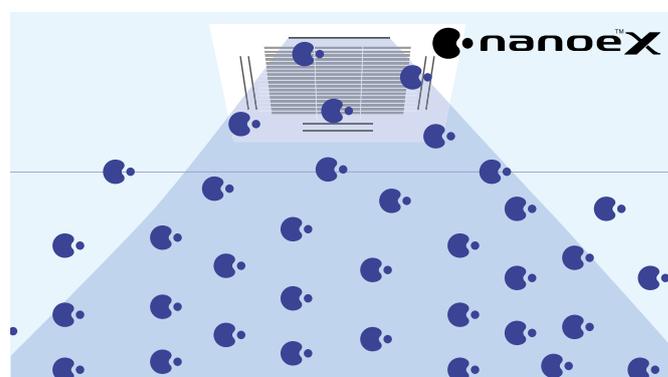

These cassettes offer upgraded Econavi and nanoe™ X purification system as accessories for making application space more comfortable, healthy and efficient.

Always fresh and clean air with nanoe™ X

- nanoe™ X is available by the advanced technology of room air conditioning.
- Purificating operation can work simultaneously or independently from heating/cooling operation.
 - Inhibiting certain viruses, bacteria & deodorisation (bacteria, fungus, pollen, virus and cigarette smoke). OH radicals in nanoe™ X pull bacteria's hydrogen out and it is effectively deodorised and sterilised
 - Clean inside by nanoe™ X + Dry control: inside of indoor unit can be cleaned by short operation circuit with nanoe™ X and drying

CZ-RTC5B and optional accessory CZ-CNEXU1 are required to use nanoe™ X function.

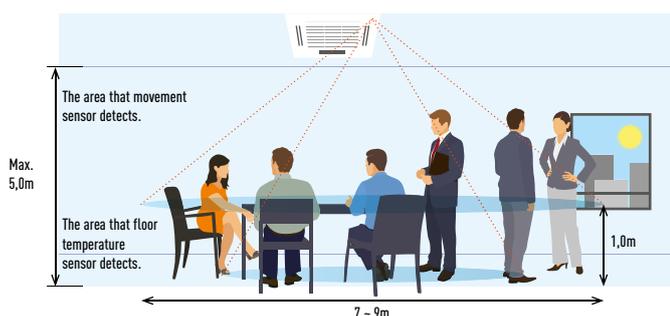

Econavi intelligent sensor

Human activity sensor and floor temperature sensor can reduce waste of energy by optimising air conditioner operation.

Advanced Econavi functions.

2 sensors (movement and floor temperature) can find waste of energy and control effectively. Floor temperature can detect up to 5m ceiling height.

Econavi exclusive panel. Optional (CZ-KPU3A)

Floor temperature sensor.
This sensor detects average floor temperature and operates circulation if floor is low temperature.

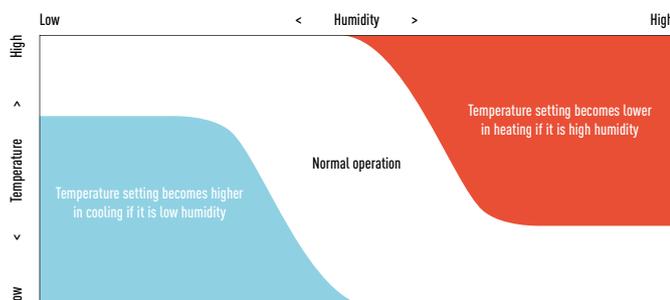

Movement sensor.
This sensor detects the amount of human activity, and operates effectively.

Wired remote controller CZ-RTC5B is required.

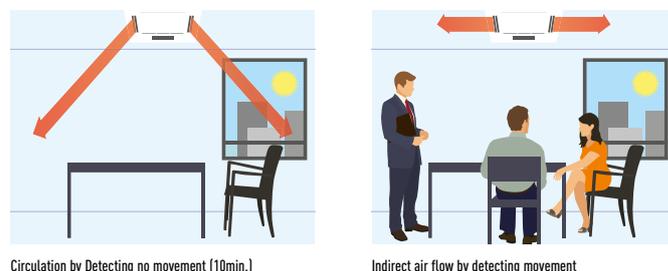

Humidity sensor.

Humidity sensor has added on air suction part, and realises comfort and energy saving based on temperature and humidity.

Group control, circulation function.

Circulating operation is activated when nobody is there, and mix air in the whole room. Minimize temperature gap in both heating and cooling operation.

NEW WALL MOUNTED PROFESSIONAL INVERTER -20°C • R32 GAS

High efficiency products for 24/7 applications. Panasonic has developed a complete range of solutions for server rooms which efficiently protect your servers, keeping them at an appropriate temperature even when the outdoor temperature is below -20°C.

High efficiency all the year

Key points:

- **NEW!** From 2,5 to 7,1kW with New TKEA R32 gas units
- Backup function
- Redundancy function
- Alternative run function
- Error information by dry contact
- Operation even at -20°C outdoor temperature
- High seasonal performance
- Product design for 24/7 operation

Splits 1x1

R32

Complete line-up with high efficiency even at -20°C.

This Wall Mounted air conditioner is especially designed for professional applications such as computer rooms where cooling inside the room is necessary even when the outside temperature is low. Furthermore this air conditioner has an automatic changeover system, in order to maintain the inside temperature even when sharp outside temperature changes occur.

Technical focus

- **NEW!** New design
- R32 gas is more environmentally friendly than R410A
- Designed for 24h/7d a week operation
- Up to A+++ in cooling
- Highly efficient even at -20°C
- High durability rolling bearings
- Additional piping sensors to prevent freezing

1) EER and COP calculation is based in accordance to EN14511. 2) Energy Label Scale from A+++ to D. 3) The annual energy consumption is calculated in accordance to EU/626/2011. 4) The sound pressure of the units shows the value measured of a position 1m in front of the main body and 0,8m below the unit. The sound pressure is measured in accordance with Eurovent 6/C/006-97 specification. Q-Lo: Quiet mode. Lo: The lowest fan speed. 5) Add 70mm for piping port. 6) When installing the outdoor unit at a higher position than the indoor unit.

SEER and SCOP: For KIT-Z25-TKEA. SUPER QUIET: For KIT-Z25-TKEA. INTERNET CONTROL: Optional.

NEW PACi STANDARD WALL MOUNTED INVERTER+ • R32 GAS

NEW
18

The range units allows for many more applications such as studios, gyms, high ceiling areas and even computer server rooms.

The unit's compact design and flat face ensure discreet installation, even in a small space.

High heating capacity at -7°C.

Technical focus

- Flat face and compact design for modern appearance
- Stylish matt white color
- DC FAN for better efficiency and control
- Six directional piping outlet
- Easy connection and control of external fan or ERV using the connector PAW-FDC on the indoor unit PCB. The external device can be control by the remote control of the Panasonic indoor unit

Optional Controller
Wireless remote controller
CZ-RWSK2

Optional Controller.
Simplified remote controller
CZ-REZC2

Optional Econavi Sensor.
CZ-CENSC1

Closed discharge port.

When the unit is turned OFF, the flap closes completely to prevent dust getting into the unit and to keep the equipment clean.

Quiet operation.

These units are among the quietest in the industry, making them ideal for hotels and hospitals.

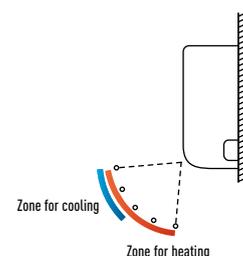

Smooth and durable design.

The sleek, compact design ensures a discreet installation - even where space is limited.

Piping outlet in six directions.

Piping outlet is possible in the six directions of right, right rear, right bottom, left, left rear and left bottom, making the installation work easier.

Air distribution is altered depending on the operational mode of the unit.

NEW PACi STANDARD 4 WAY 90x90 CASSETTE INVERTER+ • R32 GAS

NEW 18

Large capacity PACi. Trusted power and high efficiency.

Thanks to advances in design and technology such as the high performance turbo fan, more efficient and silent, the nanoe™ X air cleaner, the U2 Panasonic 4 way 90x90 cassette offers high energy saving, fresh air and comfort.

Technical focus

- High performance turbo fan, path system for heat exchanger
- Lower noise in slow fan operation
- Light weight, easy piping
- Easy installation structure of the panel
- Econavi: Floor temperature and humidity sensor added. Activity amount detection and new circulator
- nanoe™ X: The first air purifier technology in commercial air conditioning

PACi Kits

R32

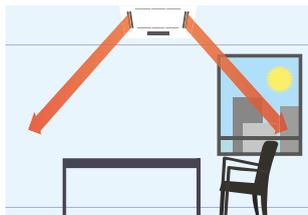

Optional Controller. Wired remote controller CZ-RTCSB
Compatible with Econavi and nanoE™ X
Optional Controller. Wireless remote control CZ-RWSU3
Optional Controller. Simplified remote controller CZ-REZC2
Econavi panel: CZ-KPU3A (CZ-RTCSB is required)
Optional nanoE™ X kit: CZ-CNEXU1 (CZ-RTCSB is required)

Group control, new circulation function

Do circulating operation when nobody there, and mix air in the whole room. Minimize temperature gap in both heating and cooling operation.

Circulation by Detecting no movement (10min.)

Indirect air flow by detecting movement

2 types of body with height difference (same as current ones)

25,6cm and 31,9cm.

Always fresh and clean air with nanoE™ X

nanoE™ X is newly developed for PACi cassette by the advanced technology of Room Air conditioning.

CZ-RTCSB and optional accessory CZ-CNEXU1 are required to use nanoE™ X function.

NEW PACi STANDARD CEILING INVERTER+

• R32 GAS

NEW
18

This range of ceiling mounted units feature a DC fan motor for increased efficiency and reduced operating sound levels.

All the units are the same height and depth for a uniform appearance in mixed installations. A knock out is provided to allow for supplementary fresh air for improved air quality.

- Twin rotary compressor dramatically reduces vibration and noise
- DC inverter control
- Large and wide air distribution
- Industry-leading low sound levels
- Twin, Triple and Double-twin split options
- Easy connection and control of external fan or ERV using the connector PAW-FDC on the indoor unit PCB. The external device can be control by the remote control of the Panasonic indoor unit

Technical focus

- Fresh air connection possible (Outside intake duct connection port of 100mm diameter is available on the unit)
- All units just 235mm high

High heating capacity at -7°C.

PACi Kits

R32

Optional Controller. Wired remote controller CZ-RTCSB
Compatible with Econavi

Optional Controller. Wireless remote controller CZ-RWST3N

Optional Controller. Simplified remote controller CZ-REZC2

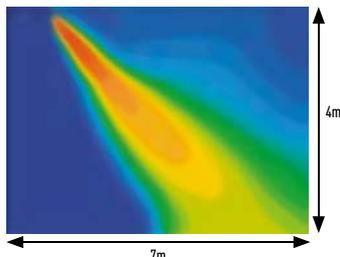

Optional Econavi Sensor CZ-CENSC1

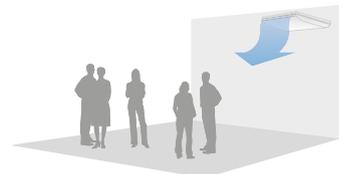

Further comfort improvement

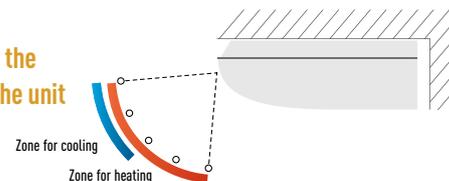

The wide air discharge opening expands the air flow to the left and the right. The unpleasant feeling caused when the air flow directly hits the human body is prevented by the "Draft prevention position", which changes the swing width, so that the degree of comfort is increased.

Further comfort improvement with airflow distribution

Air distribution is altered depending on the operational mode of the unit

1) EER and COP calculation is based in accordance to EN14511. 2) For models below 12kW, the SCOP is calculated based on values of EU/626/2011. For models above 12kW, the SCOP is calculated based on values of EU/2281/2016. 3) The annual energy consumption is calculated in accordance to EU/626/2011. 4) Heating capacity is calculated including defrost factor correction. 5) The sound pressure of the units shows the value measured at a position 1m in front of the main body and 1,5 m from the ground. The sound pressure is measured in accordance with Eurovent 6/C/006-97 specification. 6) When installing the outdoor unit at a higher position than the indoor unit.* Recommended fuse for the indoor 3A.

SEER and SCOP: For KIT-100PT2Z5 and KIT-100PT2Z8. INTERNET CONTROL: Optional.
Compatible with all Panasonic connectivity solutions. For detailed information go to the Control Systems section.

Rating Conditions: Cooling Indoor 27°C DB / 19°C WB. Cooling Outdoor 35°C DB / 24°C WB. Heating Indoor 20°C DB. Heating Outdoor 7°C DB / 6°C WB. (DB: Dry Bulb; WB: Wet Bulb)
Specifications subject to change without notice. For detailed information about ErP, please visit our websites www.aircon.panasonic.eu or www.gtc.panasonic.eu.

NEW PACi STANDARD HIGH STATIC PRESSURE HIDE AWAY INVERTER+ • R32 GAS

NEW
18

The ducted systems are the ideal solution for flexible, concealed air conditioning and the optional 200mm spigots ensure simple, hassle-free connection to spiral ductwork.

High heating capacity at -7°C.

Technical focus

- Automatic learning function for the required static pressure on site during commissioning (a standard wired remote controller is required)
- Auto restart after power failure
- Auto changeover
- Twin split options
- DC FAN for better efficiency and control
- Built in drain pump
- Easy connection and control of external fan or ERV using the connector PAW-FDC on the indoor unit PCB. The external device can be control by the remote control of the Panasonic indoor unit

1) EER and COP calculation is based in accordance to EN14511. 2) For models below 12kW, the SCOP is calculated based on values of EU/626/2011. For models above 12kW, the SCOP is calculated based on values of EU/2281/2016. 3) The annual energy consumption is calculated in accordance to EU/626/2011. 4) Heating capacity is calculated including defrost factor correction. At -10°C only for 10,0kW. 5) Medium External static pressure setting from factory. 6) The sound pressure of the units shows the value measured of a position 1m in front of the main body and 1,5 m from the ground. The sound pressure is measured in accordance with Eurovent 6/C/006-97 specification. 7) When installing the outdoor unit at a higher position than the indoor unit. * Recommended fuse for the indoor 3A.

SEER and SCOP: For KIT-100PF1Z5 and KIT-100PF1Z8. INTERNET CONTROL: Optional. Compatible with all Panasonic connectivity solutions. For detailed information go to the Control Systems section.

Rating Conditions: Cooling Indoor 27°C DB / 19°C WB. Cooling Outdoor 35°C DB / 24°C WB. Heating Indoor 20°C DB. Heating Outdoor 7°C DB / 6°C WB. (DB: Dry Bulb; WB: Wet Bulb) Specifications subject to change without notice. For detailed information about ErP, please visit our websites www.aircon.panasonic.eu or www.gtc.panasonic.eu.

WALL MOUNTED PROFESSIONAL INVERTER -20°C • R410A GAS

Complete line-up with high efficiency even at -20°C

High durability for 24/7 operation

Indoor Fan. Cross-Flow-Fan.

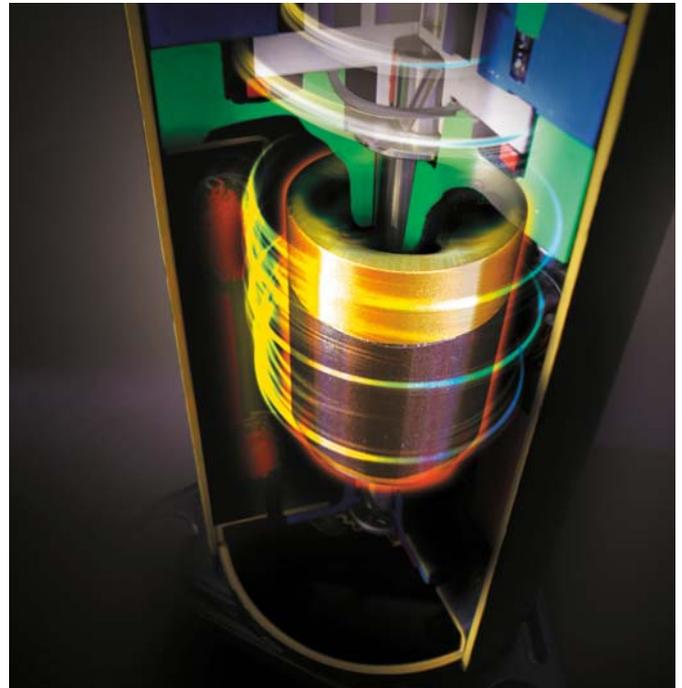

- High durability rolling bearings, large size (φ105mm) fan
- High efficiency blade
- Random pitch blade (low sound)

Compressor.

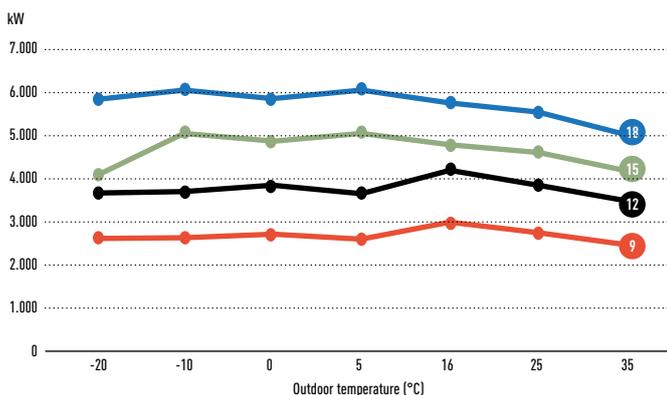

DC2P Panasonic original compressor, with high efficiency and reliability.

Why is the Panasonic R2 Rotary Compressor so efficient?

1. High efficiency motor: the premium silicon steel motor meets industry efficiency requirements
2. Improved lubrication of high volume oil pump: the extended, high volume oil pump in conjunction with a larger capacity oil reservoir provides superior lubrication
3. Accumulator has larger refrigerant capacity: the larger accumulator accommodates generous refrigerant amounts needed in longer line length installations

PKEA provides high capacity at -20°C!

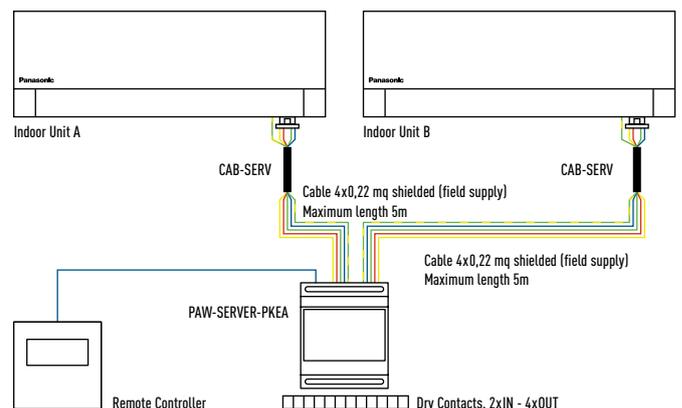

Interface option to manage server room operation

The PAW-SERVER-PKEA server room interface manages redundancy and backup of two PKEA units with two different selectable modes:

- Plug and play by embedded redundancy and backup algorithm (no external signal needed. Further details please refer to operation manual)
- External (third party PLC) redundancy and backup management by dry contact

All settings are possible without the need for a computer connection. A special Energy Saving Mode is selectable by deep switch (available only in plug and play mode). The level of remote control input prohibition can be set when external management is by dry contact.

Main Features

- Cascade management
- Back Up system
- Overheating prevention

- ECO function
- BMS management available

Only available

- CS.ZXXTKEA
- CS.EXXQKE / PKE / NKE

Splits 1x1

R410A

This Wall Mounted air conditioner is especially designed for professional applications such as computer rooms where cooling inside the room is necessary even when the outside temperature is low. Furthermore this air conditioner has an automatic changeover system, in order to maintain the inside temperature even when sharp outside temperature changes occur.

- High durability rolling bearings
- Additional piping sensors to prevent freezing

Technical focus

- This units can be installed on R22 pipings
- Designed for 24h/7d a week operation
- Highly efficient even at -20°C

Outdoor Features

- Cooling even when ambient temperature is as low as -20°C
- Electronic expansion valve (accurate sub-cooling and adjustable refrigerant flow)
- Outdoor DC fan motor to provide flexible air-flow to ensure optimum condensation pressure (works on outdoor pipe temperature sensor)

Rating Conditions for cooling capacity at low temperature: Cooling Indoor 27°C DB / 19°C WB. Cooling Outdoor 0°C DB / -10°C WB.

1) EER and COP calculation is based in accordance to EN14511. 2) Energy Label Scale from A+++ to D. SEER is calculated in base Eurovent IPLV for SBEM for U1 indoor unit SEER=a(EER25)+b(EER50)+c(EER75)+d(EER100) where EER25, EER50, EER75 and EER100 are the EER measured value at 25%, 50%, 75% and 100% part load for temperatures 20, 25, 30 and 35°C DB, respectively. a, b, c and d are values assigned for an office type. These values are given as a=0,2, b=0,36, c=0,32 and d=0,03. The internal temperatures are taken at 27°C DB and 19°C WB. 3) The annual energy consumption is calculated in accordance to EU/626/2011. 4) Heating capacity is calculated including defrost factor correction. 5) Energy Label Scale from A+++ to D. SCOP is calculated in base Eurovent IPLV for SBEM with U1 indoor unit including defrost correction factor. 6) The sound pressure of the units shows the value measured of a position 1m in front of the main body and 1,5m from the ground. The sound pressure is measured in accordance with Eurovent 6/C/006-97 specification. 7) Add 70mm for piping port. 8) When installing the outdoor unit at a higher position than the indoor unit. // Recommended fuse for the indoor 3A.

NEW PACi ELITE WALL MOUNTED INVERTER+ • R410A GAS

The extension of the range to include a 10kW unit allows for many more applications such as studios, gyms, high ceiling areas and even computer server rooms.

The unit's compact design and flat face ensure discreet installation, even in a small space.

High heating capacity at -7°C.

Technical focus

- 10,0kW capacity unit
- Flat face and compact design for modern appearance
- Stylish matt white color
- DC FAN for better efficiency and control
- Six directional piping outlet
- Easy connection and control of external fan or ERV using the connector PAW-FDC on the indoor unit PCB. The external device can be control by the remote control of the Panasonic indoor unit

NEW PACi STANDARD WALL MOUNTED INVERTER+ • R410A GAS

NEW 18

The extension of the range to include a 10kW unit allows for many more applications such as studios, gyms, high ceiling areas and even computer server rooms.

The unit's compact design and flat face ensure discreet installation, even in a small space.

High heating capacity at -7°C.

Technical focus

- 10,0kW capacity unit
- Flat face and compact design for modern appearance
- Stylish matt white color
- DC FAN for better efficiency and control
- Six directional piping outlet
- Easy connection and control of external fan or ERV using the connector PAW-FDC on the indoor unit PCB. The external device can be control by the remote control of the Panasonic indoor unit

1) EER and COP calculation is based in accordance to EN14511. 2) For models below 12kW, the SCOP is calculated based on values of EU/626/2011. For models above 12kW, the SCOP is calculated based on values of EU/2281/2016. 3) The annual energy consumption is calculated in accordance to EU/626/2011. 4) The sound pressure of the units shows the value measured of a position 1m in front of the main body and 1,5m from the ground. The sound pressure is measured in accordance with Eurovent 6/C/006-97 specification. 5) When installing the outdoor unit at a higher position than the indoor unit.* Recommended fuse for the indoor 3A.

SEER and SCOP: For KIT-36PY2E5C. INTERNET CONTROL: Optional.
Compatible with all Panasonic connectivity solutions. For detailed information go to the Control Systems section.

CZ-RE2CZ

A drain height of approximately 850mm from the ceiling surface

The drain height can be increased by approx. 350mm over the conventional value by using a high-lift drain pump, and long horizontal piping is possible.

A lightweight unit at 18kg the unit is also very slim with a height of only 288mm, making installation possible even in narrow ceilings.

Lighter and slimmer, easier installation

Lightweight and very slim which makes installation possible even in narrow ceilings.

Designed to fit exactly into a 600x600mm ceiling grid without the need to alter the bar configuration.

Significant reduction of power consumption by using highly developed DC fan motors with variable speed, special heat exchangers, etc.

PACi ELITE 4 WAY 90x90 CASSETTE INVERTER+ • R410A GAS

Large capacity PACi. Trusted power and high efficiency.

Thanks to advances in design and technology such as the high performance turbo fan, more efficient and silent, the nanoe™ X air cleaner, the U2 Panasonic 4 way 90x90 cassette offers high energy saving, fresh air and comfort.

Technical focus

- High performance turbo fan, path system for heat exchanger
- Lower noise in slow fan operation
- Light weight, easy piping
- Easy installation structure of the panel
- Econavi: Floor temperature and humidity sensor added. Activity amount detection and new circulator
- nanoe™ X: The first air purifier technology in commercial air conditioning

PACi Kits

R410A

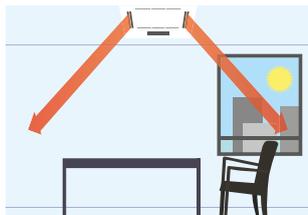

Optional Controller. Wired remote controller CZ-RTCSB Compatible with Econavi and nanoe™ X
 Optional Controller. Wireless remote controller CZ-RWSU3
 Optional Controller. Simplified remote controller CZ-REZC2
 Econavi panel: CZ-KPU3A (CZ-RTCSB is required)
 Optional nanoe™ X kit: CZ-CNEXU1 (CZ-RTCSB is required)

Group control, new circulation function

Do circulating operation when nobody there, and mix air in the whole room. Minimize temperature gap in both heating and cooling operation.

Circulation by Detecting no movement (10min.)

Indirect air flow by detecting movement

2 types of body with height difference (same as current ones)

25,6cm and 31,9cm.

Always fresh and clean air with nanoe™ X

nanoe™ X is newly developed for PACi cassette by the advanced technology of Room Air conditioning.

CZ-RTCSB and optional accessory CZ-CNEXU1 are required to use nanoe™ X function.

1) EER and COP calculation is based in accordance to EN14511. 2) For models below 12kW, the SCOP is calculated based on values of EU/626/2011. For models above 12kW, the SCOP is calculated based on values of EU/2281/2016. 3) The annual energy consumption is calculated in accordance to EU/626/2011. 4) Heating capacity is calculated including defrost factor correction. 5) The sound pressure of the units shows the value measured of a position 1m in front of the main body and 1,5m from the ground. The sound pressure is measured in accordance with Eurovent 6/C/006-97 specification. 6) When installing the outdoor unit at a higher position than the indoor unit.* Recommended fuse for the indoor 3A.

SEER and SCOP: For KIT-100PU2E5D. ECONAVI and INTERNET CONTROL: Optional.
 Compatible with all Panasonic connectivity solutions. For detailed information go to the Control Systems section.

Rating Conditions: Cooling Indoor 27°C DB / 19°C WB. Cooling Outdoor 35°C DB / 24°C WB. Heating Indoor 20°C DB. Heating Outdoor 7°C DB / 6°C WB. (DB: Dry Bulb; WB: Wet Bulb)
 Specifications subject to change without notice. For detailed information about ErP, please visit our websites www.aircon.panasonic.eu or www.ptc.panasonic.eu.

PACi STANDARD 4 WAY 90x90 CASSETTE INVERTER+ • R410A GAS

Large capacity PACi. Trusted power and high efficiency.

Thanks to advances in design and technology such as the high performance turbo fan, more efficient and silent, the nanoe™ X air cleaner, the U2 Panasonic 4 way 90x90 cassette offers high energy saving, fresh air and comfort.

Technical focus

- High performance turbo fan, path system for heat exchanger
- Lower noise in slow fan operation
- Light weight, easy piping
- Easy installation structure of the panel
- Econavi: Floor temperature and humidity sensor added. Activity amount detection and new circulator
- nanoe™ X: The first air purifier technology in commercial air conditioning

|---------------------|--|
| PAW-GRDBSE20 | Outdoor base ground support for noise and vibration absorption |
| PAW-WPH7 | Wind protection shield for 5kW outdoor unit |
| PAW-WPH9 | Wind protection shield for outdoor units 6/7kW Elite and 10/12,5kW Standard |
| PAW-WPH10 | Wind protection shield for outdoor units from 10 to 14kW Elite and 14kW Standard |

PACi Kits

R410A

Optional Controller. Wired remote controller CZ-RTCSB Compatible with Econavi and nanoe™ X

Optional Controller. Wireless remote control CZ-RWSU3

Optional Controller. Simplified remote controller CZ-REZC2

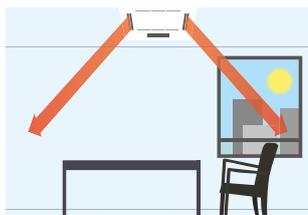

Econavi panel: CZ-KPU3A (CZ-RTCSB is required)

Optional nanoe™ X kit: CZ-CNEXU1 (CZ-RTCSB is required)

Group control, new circulation function

Do circulating operation when nobody there, and mix air in the whole room. Minimize temperature gap in both heating and cooling operation.

Circulation by Detecting no movement (10min.)

Indirect air flow by detecting movement

2 types of body with height difference (same as current ones)

25,6cm and 31,9cm.

Always fresh and clean air with nanoe™ X

nanoe™ X is newly developed for PACi cassette by the advanced technology of Room Air conditioning.

CZ-RTCSB and optional accessory CZ-CNEXU1 are required to use nanoe™ X function.

PACi ELITE CEILING INVERTER+ • R410A GAS

This range of ceiling mounted units feature a DC fan motor for increased efficiency and reduced operating sound levels.

All the units are the same height and depth for a uniform appearance in mixed installations. A knock out is provided to allow for supplementary fresh air for improved air quality.

- Twin rotary compressor dramatically reduces vibration and noise
- DC inverter control
- Large and wide air distribution
- Industry-leading low sound levels
- Twin, Triple and Double-twin split options
- Easy connection and control of external fan or ERV using the connector PAW-FDC on the indoor unit PCB. The external device can be control by the remote control of the Panasonic indoor unit

Technical focus

- Fresh air connection possible (Outside intake duct connection port of 100mm diameter is available on the unit)
- All units just 235mm high

High heating capacity at -7°C.

PACi Kits

R410A

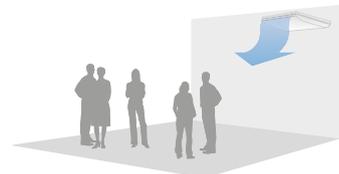

Further comfort improvement

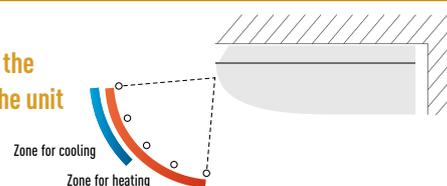

The wide air discharge opening expands the air flow to the left and the right. The unpleasant feeling caused when the air flow directly hits the human body is prevented by the "Draft prevention position", which changes the swing width, so that the degree of comfort is increased.

Further comfort improvement with airflow distribution

Air distribution is altered depending on the operational mode of the unit

1) EER and COP calculation is based in accordance to EN14511. 2) For models below 12kW, the SCOP is calculated based on values of EU/626/2011. For models above 12kW, the SCOP is calculated based on values of EU/2281/2016. 3) The annual energy consumption is calculated in accordance to EU/626/2011. 4) Heating capacity is calculated including defrost factor correction. 5) The sound pressure of the units shows the value measured of a position 1m in front of the main body and 1,5m from the ground. The sound pressure is measured in accordance with Eurovent 6/C/006-97 specification. 6) When installing the outdoor unit at a higher position than the indoor unit.* Recommended fuse for the indoor 3A.

SEER and SCOP: For KIT-60PT2E5D. INTERNET CONTROL: Optional.
Compatible with all Panasonic connectivity solutions. For detailed information go to the Control Systems section.

Rating Conditions: Cooling Indoor 27°C DB / 19°C WB. Cooling Outdoor 35°C DB / 24°C WB. Heating Indoor 20°C DB. Heating Outdoor 7°C DB / 6°C WB. (DB: Dry Bulb; WB: Wet Bulb)
Specifications subject to change without notice. For detailed information about ErP, please visit our websites www.aircon.panasonic.eu or www.ptc.panasonic.eu.

PACi STANDARD CEILING INVERTER+

• R410A GAS

This range of ceiling mounted units feature a DC fan motor for increased efficiency and reduced operating sound levels.

All the units are the same height and depth for a uniform appearance in mixed installations. A knock out is provided to allow for supplementary fresh air for improved air quality.

- Twin rotary compressor dramatically reduces vibration and noise
- DC inverter control
- Large and wide air distribution
- Industry-leading low sound levels
- Twin, Triple and Double-twin split options
- Easy connection and control of external fan or ERV using the connector PAW-FDC on the indoor unit PCB. The external device can be control by the remote control of the Panasonic indoor unit

Technical focus

- Fresh air connection possible (Outside intake duct connection port of 100mm diameter is available on the unit)
- All units just 235mm high

High heating capacity at -7°C.

1) EER and COP calculation is based in accordance to EN14511. 2) For models below 12kW, the SCOP is calculated based on values of EU/626/2011. For models above 12kW, the SCOP is calculated based on values of EU/2281/2016. 3) The annual energy consumption is calculated in accordance to EU/626/2011. 4) Heating capacity is calculated including defrost factor correction. 5) The sound pressure of the units shows the value measured of a position 1m in front of the main body and 1,5m from the ground. The sound pressure is measured in accordance with Eurovent 6/C/006-97 specification. 6) When installing the outdoor unit at a higher position than the indoor unit.* Recommended fuse for the indoor 3A.

SEER and SCOP: For KIT-60PTY2E5D. INTERNET CONTROL: Optional.
Compatible with all Panasonic connectivity solutions. For detailed information go to the Control Systems section.

Rating Conditions: Cooling Indoor 27°C DB / 19°C WB. Cooling Outdoor 35°C DB / 24°C WB. Heating Indoor 20°C DB. Heating Outdoor 7°C DB / 6°C WB. (DB: Dry Bulb; WB: Wet Bulb)
Specifications subject to change without notice. For detailed information about ErP, please visit our websites www.aircon.panasonic.eu or www.ptc.panasonic.eu.

PACi ELITE HIGH STATIC PRESSURE HIDE AWAY INVERTER+ • R410A GAS

The ducted systems are the ideal solution for flexible, concealed air conditioning and the optional 200mm spigots ensure simple, hassle-free connection to spiral ductwork.

High heating capacity at -7°C.

Technical focus

- Automatic learning function for the required static pressure on site during commissioning (a standard wired remote controller is required)
- Quiet operation from 25dB(A)
- Auto restart after power failure
- Auto changeover
- Twin, triple and double-twin split options
- DC FAN for better efficiency and control
- Built in drain pump
- Easy connection and control of external fan or ERV using the connector PAW-FDC on the indoor unit PCB. The external device can be control by the remote control of the Panasonic indoor unit

Standardized height of 290mm for all models. Height standardization enables easy and uniform installation for models with different capacities.

Built-in Drain pump (DC motor pump)

- Built-in filter
- Side removable filter

External electrical equipment box makes maintenance easy. P-link PCB

The static pressure outside the unit can be increased up to 150 Pa

| Type | | 36 | 45 | 50 | 60 | 71 | 100 | 125 | 140 |
|---------------------------|----|-----|-----|-----|-----|-----|-----|-----|-----|
| Standard | Pa | 70 | 70 | 70 | 70 | 70 | 100 | 100 | 100 |
| Maximum available setting | Pa | 150 | 150 | 150 | 150 | 150 | 150 | 150 | 150 |

More powerful drain pump

Using a high-lift drain pump, drain piping can be elevated up to 785mm from the base of the unit.

1) EER and COP calculation is based in accordance to EN14511. 2) For models below 12kW, the SCOP is calculated based on values of EU/626/2011. For models above 12kW, the SCOP is calculated based on values of EU/2281/2016. 3) The annual energy consumption is calculated in accordance to EU/626/2011. 4) Heating capacity is calculated including defrost factor correction. 5) Medium external static pressure setting from factory. 6) The sound pressure of the units shows the value measured at a position 1m in front of the main body and 1,5m from the ground. The sound pressure is measured in accordance with Eurovent 6/C/006-97 specification. 7) When installing the outdoor unit at a higher position than the indoor unit.* Recommended fuse for the indoor 3A.

SEER and SCOP: For KIT-71PF1E5D. INTERNET CONTROL: Optional. Compatible with all Panasonic connectivity solutions. For detailed information go to the Control Systems section.

Rating Conditions: Cooling Indoor 27°C DB / 19°C WB. Cooling Outdoor 35°C DB / 24°C WB. Heating Indoor 20°C DB. Heating Outdoor 7°C DB / 6°C WB. (DB: Dry Bulb; WB: Wet Bulb) Specifications subject to change without notice. For detailed information about ErP, please visit our websites www.aircon.panasonic.eu or www.ptc.panasonic.eu.

PACi STANDARD HIGH STATIC PRESSURE HIDE AWAY INVERTER+ • R410A GAS

The ducted systems are the ideal solution for flexible, concealed air conditioning and the optional 200mm spigots ensure simple, hassle-free connection to spiral ductwork.

High heating capacity at -7°C.

Technical focus

- Automatic learning function for the required static pressure on site during commissioning (a standard wired remote controller is required)
- Quiet operation from 26dB(A)
- Auto restart after power failure
- Auto changeover
- Twin split options
- DC FAN for better efficiency and control
- Built in drain pump
- Easy connection and control of external fan or ERV using the connector PAW-FDC on the indoor unit PCB. The external device can be control by the remote control of the Panasonic indoor unit

| 100, 125 & 140 | 4xØ 200 | CZ-DUMPA160MF2 |

Standardized height of 290mm for all models.
Height standardization enables easy and uniform installation for models with different capacities.

Built-in Drain pump (DC motor pump)

External electrical equipment box makes maintenance easy. P-link PCB

- Built-in filter
- Side removable filter

The static pressure outside the unit can be increased up to 150 Pa

| Type | | 36 | 45 | 50 | 60 | 71 | 100 | 125 | 140 |
|---------------------------|----|-----|-----|-----|-----|-----|-----|-----|-----|
| Standard | Pa | 70 | 70 | 70 | 70 | 70 | 100 | 100 | 100 |
| Maximum available setting | Pa | 150 | 150 | 150 | 150 | 150 | 150 | 150 | 150 |

More powerful drain pump

Using a high-lift drain pump, drain piping can be elevated up to 785mm from the base of the unit.

1) EER and COP calculation is based in accordance to EN14511. 2) For models below 12kW, the SCOP is calculated based on values of EU/626/2011. For models above 12kW, the SCOP is calculated based on values of EU/2281/2016. 3) The annual energy consumption is calculated in accordance to EU/626/2011. 4) Heating capacity is calculated including defrost factor correction. 5) Medium external static pressure setting from factory. 6) The sound pressure of the units shows the value measured of a position 1m in front of the main body and 1,5m from the ground. The sound pressure is measured in accordance with Eurovent 6/C/006-97 specification. 7) When installing the outdoor unit at a higher position than the indoor unit.* Recommended fuse for the indoor 3A.

SEER and SCOP: KIT-60PFY1E5D. INTERNET CONTROL: Optional.
Compatible with all Panasonic connectivity solutions. For detailed information go to the Control Systems section.

Rating Conditions: Cooling Indoor 27°C DB / 19°C WB. Cooling Outdoor 35°C DB / 24°C WB. Heating Indoor 20°C DB. Heating Outdoor 7°C DB / 6°C WB. (DB: Dry Bulb; WB: Wet Bulb)

PACi ELITE LOW STATIC PRESSURE HIDE AWAY INVERTER+ • R410A GAS

The depth of only 250mm provides greater installation flexibility and the unit can be used in more applications. Ideal for sites with narrow ceiling voids.

High heating capacity at -7°C.

Ultra-slim profile: 250mm height for all models.

Technical focus

- Automatic learning function for the required static pressure on site during commissioning (a standard wired remote controller is required. S-60/71/100/125/140PN1E5A models only)
- Compact indoor units without loosing static pressure (only 250mm high)
- 50 Pa static pressure
- Easy maintenance and service via external electrical box
- 3 speed centrifugal fan through wired or wireless remote control
- DC FAN for better efficiency and control
- Easy connection and control of external fan or ERV using the connector PAW-FDC on the indoor unit PCB. The external device can be control by the remote control of the Panasonic indoor unit

PACi Kits

R410A

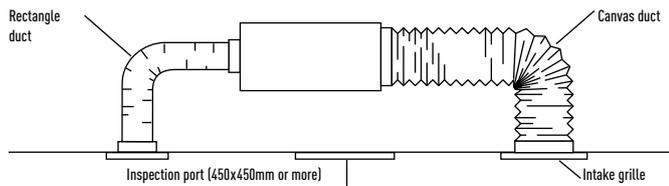

Optional Controller. Wired remote controller CZ-RTCSB
Compatible with Econavi
Optional Controller. Wireless remote controller CZ-RWSC2 + CZ-RWSC3
Optional Controller. Simplified remote controller CZ-REZC2
Optional Econavi Sensor. CZ-CENSC1

System Example

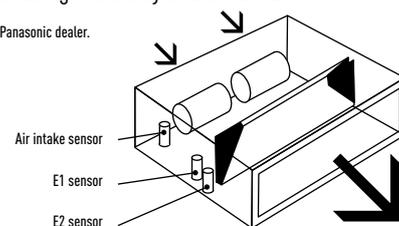

An inspection port (450mmx450mm or more) is required at the control-box side of the indoor unit body.

Cold Drafts Reduction at Heating

Accurate DX Coil temperature measurement by E1 and E2 sensor to reduce cold drafts at heating and increasing efficiency and comfort.

Before spec-in, please consult with an authorized Panasonic dealer.

1) EER and COP calculation is based in accordance to EN14511. 2) For models below 12kW, the SCOP is calculated based on values of EU/626/2011. For models above 12kW, the SCOP is calculated based on values of EU/2281/2016. 3) The annual energy consumption is calculated in accordance to EU/626/2011. 4) Heating capacity is calculated including defrost factor correction. 5) Medium external static pressure setting from factory. 6) The sound pressure of the units shows the value measured of a position 1m in front of the main body and 1,5m from the ground. The sound pressure is measured in accordance with Eurovent 6/C/006-97 specification. 7) Add 100mm for piping port. 8) When installing the outdoor unit at a higher position than the indoor unit.* Recommended fuse for the indoor 3A.

SEER and SCOP: KIT-100PN1E8C. INTERNET CONTROL: Optional.
Compatible with all Panasonic connectivity solutions. For detailed information go to the Control Systems section.

Rating Conditions: Cooling Indoor 27°C DB / 19°C WB. Cooling Outdoor 35°C DB / 24°C WB. Heating Indoor 20°C DB. Heating Outdoor 7°C DB / 6°C WB. (DB: Dry Bulb; WB: Wet Bulb)
Specifications subject to change without notice. For detailed information about ErP, please visit our websites www.aircon.panasonic.eu or www.ptc.panasonic.eu.

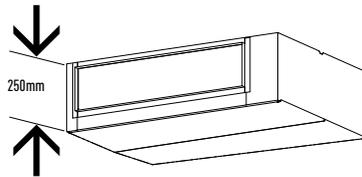

PACi STANDARD LOW STATIC PRESSURE HIDE AWAY INVERTER+ • R410A GAS

The depth of only 250mm provides greater installation flexibility and the unit can be used in more applications. Ideal for sites with narrow ceiling voids.

High heating capacity at -7°C.

Ultra-slim profile: 250mm height for all models.

Technical focus

- Automatic learning function for the required static pressure on site during commissioning (a standard wired remote controller is required. S-60/71/100/125/140PN1E5A models only)
- Compact indoor units without loosing static pressure (only 250mm high)
- 50 Pa static pressure
- Easy maintenance and service via external electrical box
- 3 speed centrifugal fan through wired or wireless remote control
- DC FAN for better efficiency and control
- Easy connection and control of external fan or ERV using the connector PAW-FDC on the indoor unit PCB. The external device can be control by the remote control of the Panasonic indoor unit

1) EER and COP calculation is based in accordance to EN14511. 2) For models below 12kW, the SCOP is calculated based on values of EU/626/2011. For models above 12kW, the SCOP is calculated based on values of EU/2281/2016. 3) The annual energy consumption is calculated in accordance to EU/626/2011. 4) Heating capacity is calculated including defrost factor correction. 5) Medium external static pressure setting from factory. 6) The sound pressure of the units shows the value measured of a position 1m in front of the main body and 1,5m from the ground. The sound pressure is measured in accordance with Eurovent 6/C/006-97 specification. 7) Add 100mm for piping port. 8) When installing the outdoor unit at a higher position than the indoor unit.* Recommended fuse for the indoor 3A.

SEER and SCOP: KIT-100PNY1E5C. INTERNET CONTROL: Optional.
Compatible with all Panasonic connectivity solutions. For detailed information go to the Control Systems section.

Rating Conditions: Cooling Indoor 27°C DB / 19°C WB. Cooling Outdoor 35°C DB / 24°C WB. Heating Indoor 20°C DB. Heating Outdoor 7°C DB / 6°C WB. (DB: Dry Bulb; WB: Wet Bulb)

**BIG PACi HIGH STATIC PRESSURE HIDE AWAY
20,0-25,0kW INVERTER+ • R410A GAS**

Panasonic breaks new ground in offering high performance and power in a small space

- High efficiency: Panasonic compressor
- Better partial load
- More flexible
- Bluefin anti-rust coating
- 0-10V control demand

The light net weight and compact design enables easier installation in any commercial space. The twin fan system saves valuable footprint compared to traditional 20,0-25,0kW systems which are larger and therefore require more space.

All "A" Functions

- Control demand 0-10V via CZ-CAPBC2
- Schedule peak cut
- Advanced energy saving functionalities available in Elite series
- Compact design: Good size to install balcony
- Suitable for mid, small project: piping design is suitable for light commercial and residential project

The 20,0-25,0kW from Panasonic is ideally suited for large retail applications and other large areas not needing the higher capacities of VRF systems.

Enlarged heat exchanger surface area with double surface

The heat exchanger features a double-surface construction. Compared to the divided dual-surface construction in current models, there is no division of space and the area for heat exchange is larger. Also, highly efficient piping pattern increases heat exchange performance by 5%.

Bluefin

An air conditioner's performance depends largely on its condenser, which can take a beating from exposure to salty air, wind, dust and other corrosive factors. Panasonic has found a way to expand the life of our condensers, using a layer of our original anti-rust coating. This special coating lets you enjoy more years of reliable comfort plus extra economy over the long run.

Panasonic Compressor

Best inverter control providing better partial load in industry* 10%-100% Frequency Hz. Wider operation Hz range of compressor realize more high efficient operation through the year.

* Compared current model is the unit for European market.

Panasonic breaks new ground in offering high performance and power in a small space

The 8-10HP from Panasonic is ideally suited for large retail applications and other large areas not needing the higher capacities of VRF systems. The lightweight and compact design enables easier installation in any commercial space. The twin fan system saves valuable footprint compared to traditional 8-10HP systems which are larger and therefore require more space.

High heating capacity at -7°C.

Technical focus

- High efficiency:
- Panasonic compressor
- Better partial load
- More flexible
- Bluefin anti-rust coating
- 0-10V control demand

PACi SINGLE, TWIN, TRIPLE AND DOUBLE-TWIN SYSTEM • R32 GAS AND • R410A GAS

1 PACi Standard from 10,0 to 12,5kW

Up to 2 indoor units connectable on the same outdoor. Panasonic's PACi units can be installed as single and twin systems. The indoor units can be combined following the selection table. The operation will always be simultaneous. All the indoor units will work with the same settings.

2 PACi Elite from 7,1 to 14,0kW

Up to 4 indoor units can be connected to the same outdoor unit. Panasonic's PACi units 71, 100, 125 and 140 can be installed as twin, triple and double-twin systems. The indoor units can be combined as per the selection table. The operation will always be simultaneous. All the indoor units will work with the same settings.

3 Big PACi Elite from 20,0 to 25,0kW

Up to 4 indoor units can be connected to the same outdoor unit. Panasonic's PACi units 200 and 250 can be installed as twin, triple and double-twin systems. The indoor units can be combined as per the selection table. The operation will always be simultaneous. All the indoor units will work with the same settings.

With this system, a single outdoor unit can split capacity for up to 4 indoor areas simultaneously. This makes the system particularly apt for common areas. It reduces noise concentration and enables the same temperature to be reached around the room. A mix of indoor units can be installed (wall, cassette, duct, ceiling) in one system.

PACi Single, Twin, Triple and Double-Twin System

R32 R410A

Optional Controller.
Wired remote controller
CZ-RICS9
Compatible with Econavi

Optional Controller
Wireless remote controller
CZ-RWSK2

Optional Controller.
Simplified remote controller
CZ-RE2C2

Compatible with all Panasonic connectivity solutions. For detailed information go to the Control Systems section.

PACi Standard Single and Twin System from 10,0 to 14,0kW

Twin System

Outdoor unit main pipe diameter (L)

Indoor unit connection tube (L1, L2)

| | 100 | 125 | 50 | 60 |
|-----------------------------|---------|---------|---------|---------|
| Unit type capacity | 100 | 125 | 50 | 60 |
| Liquid pipe (mm) | Ø 9,52 | Ø 12,70 | Ø 6,35 | Ø 9,52 |
| Gas pipe (mm) | Ø 15,88 | Ø 15,88 | Ø 12,70 | Ø 15,88 |
| Additional gas amount (g/m) | 50 | 50 | 20 | 50 |

1. Total capacity of indoor unit connected after the branch

Refrigerant charging: For the twin connection, the amount of refrigerant required for pipe length 30m has been included in this unit at the factory while that required for pipe length 20 m has been included for the Triple / Double-Twin connections. No Additional gas amount is required for the first 30m pipe length in the case of the twin connection and for the first 20m in the case of the Triple / Double-Twin connections. The amount of included refrigerant for each model is listed on NAME PLATE. Make Additional gas amounts by adding up pipe length in an order of main (L branch pipe), (L1, L2, L3 wide diameter) and then selecting the amount of refrigerant corresponding to the remaining (after 30m for the Twin connection and after 20m for the Triple / Double-Twin connections) liquid side pipe diameter and pipe length from the below table.

PACi Standard Twin System from 10,0 to 14,0kW
 Joint distribution (sold separately)
 A= CZ-P224BK2BM

1. Total capacity of indoor unit connected after the branch

Refrigerant charging: For the twin connection, the amount of refrigerant required for pipe length 30m has been included in this unit at the factory while that required for pipe length 20 m has been included for the Triple / Double-Twin connections.

No Additional gas amount is required for the first 30m pipe length in the case of the twin connection and for the first 20m in the case of the Triple / Double-Twin connections. The amount of included refrigerant for each model is listed on NAME PLATE.

Make Additional gas amounts by adding up pipe length in an order of main (L branch pipe), (L1, L2, L3 wide diameter) and then selecting the amount of refrigerant corresponding to the remaining (after 30m for the Twin connection and after 20m for the Triple / Double-Twin connections) liquid side pipe diameter and pipe length from the below table.

PANASONIC VENTILATION SOLUTIONS

Panasonic ventilation solutions for maximum savings and easy integration.

AHU Kit connects PACi outdoor units to Air Handling Units system¹

Heat exchanger, Fan & Fan motor to be mounted in AHU Kit shall be provided in the field.

AHU connection Kit (field supplied) AHU Kit system. (Contents of kit: Control for PCB, expansion valve, sensors).

Application: Hotels, offices, server rooms or all large buildings where air quality control such as humidity control and fresh air and is needed.

AHU Kit combine air conditioning and fresh air in just one solution.

The Panasonic AHU Kits offer a wealth of connectivity possibilities so can be easily integrated into many systems.

Besides the advantages in terms of indoor air quality, air conditioning offers also an energy saving potential. For example, while uncontrolled ventilation through open windows leads to large amounts of heat being lost to the outside during the heating season or gained from the outside during the cooling season, air conditioning systems provide possibilities to utilize the extra "free" energy in heat recovery modules so that overall operating costs will be reduced.

The larger the area of the comfort range, the better the energy saving opportunities.

¹) Connectable to R32 or R410A. Compatible with R32 models. Special setting is required.

Air Curtain with DX Coil¹

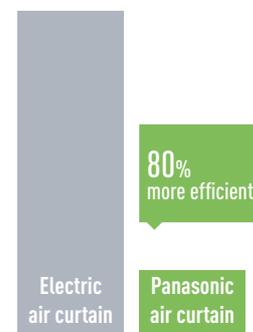

Highly efficient heating effect

The combined air stream, which has a desirable low air current induction factor (mixing factor), can carry the selected initial temperature effect over long distances, and will reach the floor area while still at room temperature. This is necessary to avoid cooling down the interior spaces.

The Panasonic range of air curtains is designed for smooth operation and efficient performance. Air curtains produce a continuous stream of air blown from the top to the bottom of an open doorway and create a barrier that people and products can flow across, but air can't. Designed to improve energy efficiency, minimise heat loss from a building, and to allow retailers to keep doors open to encourage customers, our Air Curtains are suitable for connection to both VRF and PACi Systems.

Heating capacity comparison: Electrical air curtain / Panasonic air curtain

* With the U-100PE1E5A on the PAW-20PAIRC-MS. Calculation method: Taking as consideration SCOP of the Panasonic combination of 6.0. If 100 is the energy needed for a air curtain, Panasonic Air curtain will need 1/(1-6)*100=20.

NEW ELECTRIC AIR CURTAIN

1 Newly designed to maximize performance

High Air volume upgraded 145% compared to conventional model (in the case of FY-3009U1).

2 Comprehensive product line up

1,5m wide model added in the line up.

3 Easier installation & maintenance

Simple structure for easy installation & maintenance.

AIR HANDLING UNIT KIT 10-25kW FOR PACi. COMPATIBLE WITH R32 OR R410A OUTDOOR UNITS

Panasonic AHU Kit, 10-25kW connected to PACi outdoor unit

The Air Handling Unit Kit has been developed to better meet customer demand: IP 65 Box in order to be installed outside, 0-10V demand control* and easy control by BMS

* Only available with Elite PACi, up to from 6kW to 14kW.

Demand control on the outdoor unit managed by external 0-10 V signal.

Control option 1: PAW-280PAH2L

- The system's control is simple: control of actual suction temperature vs. set point
- Control works in the same way as that of any indoor unit
- Fan signal issued by the PCB (OFF while defrosting, for instance)

Control option 2: PAW-280PAH2

- System control by probe located at air intake. Sensor works as a 0-10V control thermostat which manages the set point temperature. Control to prevent cold draughts.

- All signals as per standard

Control option 3: PAW-280PAH2

- System control by external environment probe. Sensor works as a 0-10V control thermostat which manages the set point temperature. Enhances efficiency by adjusting capacity to the ambient temperature and enhances comfort as well.

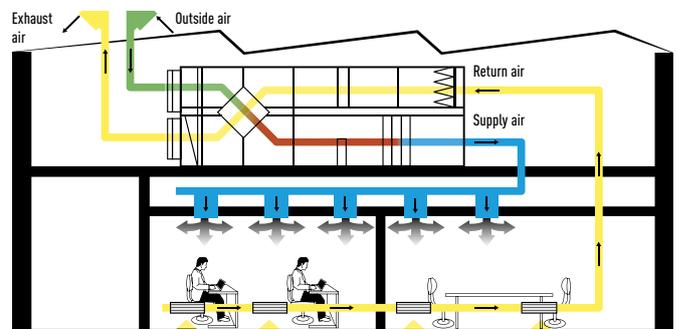

- All signals as per standard

Control option 4: PAW-280PAH2

- System control by a 0-10V control working from an external BMS that manages the set point for the temperature or the capacity. Enhances efficiency by adjusting capacity to the ambient temperature and enhances comfort as well.
- All signals as per standard

Main components of mechanical ventilation systems

The main components of a mechanical ventilation system are the following: Air Handling Unit (AHU), air ducts and air distribution elements.

0-10V control

With the 0-10 v demand control the capacity of the outdoor unit can be controlled by 20 steps.

With the included resistance. 0-10V control scheme with 10V= maximum capacity

| | | | | | | | | | | | | | | | | | | |
|-------------------------------|-------------------|-----|------|-----|-----|------|-----|------|-----|------|-----|------|-----|-----|------|-----|------|---------------------------------------|
| Input Voltage* (V) | 0 - 0,55 | 1,1 | 1,65 | 2,2 | 2,8 | 3,35 | 3,9 | 4,45 | 5,0 | 5,55 | 6,1 | 6,65 | 7,2 | 7,8 | 8,35 | 8,9 | 9,45 | 10,0 |
| Demand (% of nominal current) | Stop ¹ | 40 | 45 | 50 | 55 | 60 | 65 | 70 | 75 | 80 | 85 | 90 | 95 | 100 | 105 | 110 | 115 | No limit / Full capacity ³ |

When you remove the resistance. 0-10V control scheme with 10V= Thermo-Off

| | | | | | | | | | | | | | | | | | | | |
|-------------------------------|-------------------|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----------------------|-------------------------|
| Input Voltage* (V) | 0 - 0,5 | 1,0 | 1,5 | 2,0 | 2,5 | 3,0 | 3,5 | 4,0 | 4,5 | 5,0 | 5,5 | 6,0 | 6,5 | 7,0 | 7,5 | 8,0 | 8,5 | 9,0 | 9,5 - 10,0 |
| Demand (% of nominal current) | Stop ¹ | 40 | 45 | 50 | 55 | 60 | 65 | 70 | 75 | 80 | 85 | 90 | 95 | 100 | 105 | 110 | 115 | No limit ² | Thermo-Off ³ |

* If a voltage range (0 - 0,5 or 9,5 - 10,0V) is indicated, the applied voltage must be within the given limits.

However, if a single value (e.g. 1,0V) is indicated, the applied voltage must be within +/-0,1V of the given value to achieve the assigned demand setting.

Examples: "Stop" can be achieved with any analogue input value greater than 0V and less than or equal to 0,5 V; 40% demand can be achieved with any analogue input value greater than or equal to 0,9V and less than or equal to 1,1V etc.

1) Stop: AHU system / indoor unit is completely switched off.

2) No Limit: No restrictions applied by BMS to AHU system / indoor unit performance (equivalent to "full-load operation" of AHU system / indoor unit).

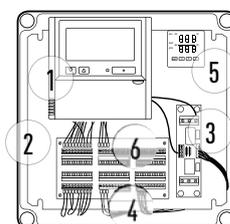

3) Thermo-Off: No cooling / heating operation (compressor is switched off; however, the fans may still be operating). For example, forced Thermostat-Off mode can be used for free cooling.

AHU Kit connects PACi outdoor units to Air Handling Units system.
 The Panasonic AHU Kits offer a wealth of connectivity possibilities so can be easily integrated into many systems.
 Application: Hotels, offices, server rooms or all large buildings where air quality control such as humidity control and fresh air and is needed.

3 types of AHU Kit: Deluxe, Medium and Light.

| Model Code | IP 65 | 0-10V demand control* | Outdoor temperature shift compensation. Cold draft prevention |
|--------------|-------|-----------------------|---|
| PAW-280PAH2 | Yes | Yes | Yes |
| PAW-280PAH2M | Yes | Yes | No |
| PAW-280PAH2L | Yes | No | No |

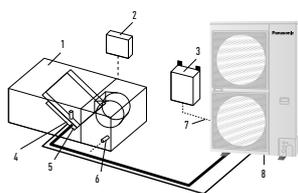

* With CZ-CAPBC2.

1. Remote control CZ-RTC4
2. New plastic IP 65 Box
3. PAW-T10 PCB for dry contact
4. 0-10V demand control PCB
5. Intelligent thermostat for:
 - Cold draft prevention
 - Outdoor temperature shift compensation
6. Terminal base for sensors and power supply

System & regulations. System overview

1. AHU Kit equipment (Field supplied)
2. AHU Kit system controller (Field supplied)
3. AHU Kit controller box (with control PCB)
4. Thermistor for Gas pipe (E2)
5. Thermistor for Liquid pipe (E1)
6. Thermistor for Suction air
7. Inter-unit wiring
8. Outdoor unit

AHU Connection Kit

PCB, Power trans, Terminal block

Thermistor x2 (Refrigerant: E1, E2)

Thermistor (Air: TA; 1 sensor)

Standard wired remote controller.

Optional parts: Following functions are available by using different control accessories:

CZ-RTC4 Timer remote controller.

- Operation-ON/OFF
- Mode select
- Temperature setting

* Fan operation signal can be taken from the PCB.

PAW-OCT, DC12 V outlet. OPTION terminal.

- Output signal= Cooling/Heating/Fan status
- Defrost
- Thermostat-ON

CZ-CAPBC2 Mini seri-para I/O unit (advanced version only).

- Easy integration in external AHU control systems and BMS
- Demand control: 40 to 115 % [5 % steps] of nominal current by 0-10 V input signal*
- Target temperature setting by 0-10 V or 0-140 Ω input signal*
- Room supply air temperature output by 4-20 mA signal
- Mode select or/and ON/OFF control
- Fan operation control
- Operation status output/ Alarm output
- Thermostat ON/OFF control

* Demand control by external BMS cannot be combined with the demand control or target temperature setting accomplished by the thermostat. However, if simultaneous demand control and target temperature setting is needed, this can only be achieved by using a second (optional) CZ-CAPBC2 interface.

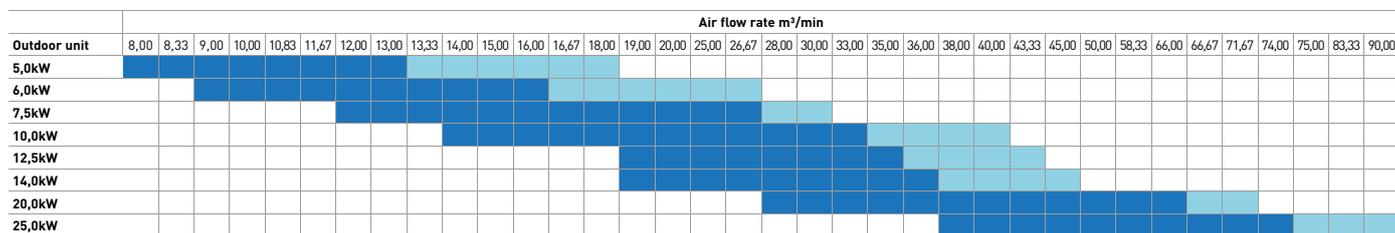

CZ-T10 terminal / PAW-T10 PCB to connect to T10 connector.

- A Dry contact PCB has been developed to easily control the unit
- Input signal operation ON/OFF
- Remote control prohibition
- Output signal Operation ON status maximum 230 V 5 A (NO/NC)
- Output signal alarm status max. 230 V 5 A (NO/NC)
- Alarm output (by DC12V)
- Additional available contacts:
 - External humidifier control (ON/OFF) 230 VAC 3 A
 - External fan control (ON/OFF) 12V DC
 - External filter status signal potential free
 - External float switch signal potential free
 - External leakage detection sensor or TH. OFF contact potential free (possible usage for external blow out temperature control)

AIR CURTAIN WITH DX COIL, CONNECTED TO THE VRF OR PACi SYSTEMS. COMPATIBLE WITH R32 OR R410A OUTDOOR UNITS

Highly efficient heating effect

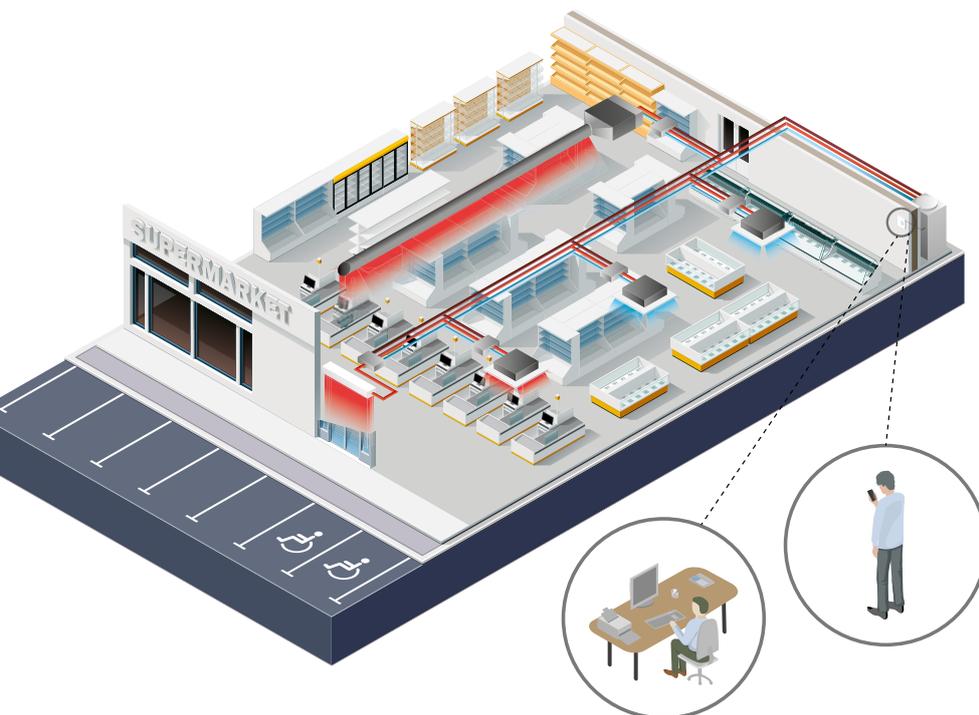

The combined air stream, which has a desirable low air current induction factor (mixing factor), can carry the selected initial temperature effect over long distances, and will reach the floor area while still at room temperature. This is necessary to avoid cooling down the interior spaces. Available in different lengths to suit requirements between 1 and 2,5m, both air curtains have outlet grilles that can be adjusted to five different positions. The jet flow model can be installed up to a height of 3,5m with the standard model up to 3,0m. The outlet grilles can be easily adjusted into five positions to suit different installations requirements and the air filter can be accessed without the need for specialist tools.

- High performance with EC fan motor (40% lower running costs compared to a standard AC fan motor)
- Easy Cleaning and Servicing
- Can be connected to either Panasonic VRF or PACi systems
- Built-in drain for cooling operation
- Standard and Jet Flow air curtains can be controlled via Panasonic's range of remote internet controls

The standard and jet-flow models are ideal for connection to a ECOi or PACi system. With simple "plug and play" installation, both are fitted with an EC fan motor for a smooth operation and efficient performance. This fan guarantees 40% lower running cost than with a standard AC fan motor. Air curtains run approximately 12 hours per day at shops, and efficient performance contributes to energy savings.

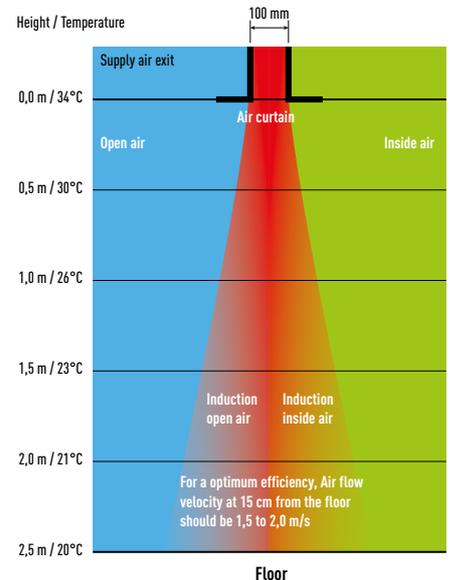

Internet Control

An app added to your tablet or smartphone or via the Internet allows you to control and manage the system remotely. There is also the option to integrate into existing BMS systems by using other Panasonic interfaces.

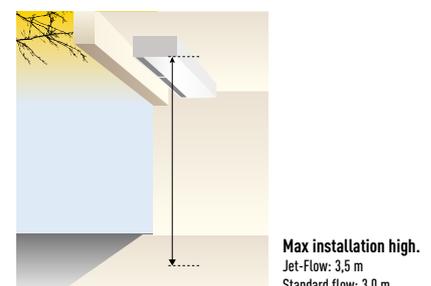

Intelligent Operation

Our air curtains combine airflow and heating / cooling technology to ensure optimum comfort and energy efficiency whilst also creating an effective barrier between indoor and outdoor environments. Design and installation is key to achieving the correct height / temperature settings to achieve optimum performance. Our air curtains are designed to answer the demands of the retail, commercial and industrial markets.

How does it work?

Stale air from the room is taken in and ejected near the door. This creates a 'roll of air' that shields the door area, mixing with the colder incoming air. It then turns away from the door, back into the room and toward the intake screen, where it is partly drawn in again. This flow of air helps to create a barrier for heat loss yet at the same time refreshes room air

High efficiency air curtain connected to your VRF installation. EC Fan motor for a smooth operation and efficient performance. 2 types of air flow available: Jet-Flow and Standard. Easy cleaning and servicing.

Technical focus

- Save up to 40% energy costs by use of the integrated EC fan technology (higher efficiency than conventional AC fan, soft start and longer motor duration)
- 3 lengths of air curtains Jet-Flow, from 1,0 to 2,0 m and 2 lengths of air curtains Standard, 1,0 and 2,0 m
- Installation height up to 3,5 m (Jet-Flow) and 3,0 m (Standard)
- Outlet grilles can be adjusted in five positions, to suite different indoor and installation requirements (Jet-Flow)
- Control with Panasonic remote control systems (optional)
- Direct integration to BMS by optional Panasonic interfaces
- Drain included for cooling operation

Features

Comfort.

- Easy redirection of Airflow by means of manual deflector (Jet-Flow)

Ease of use.

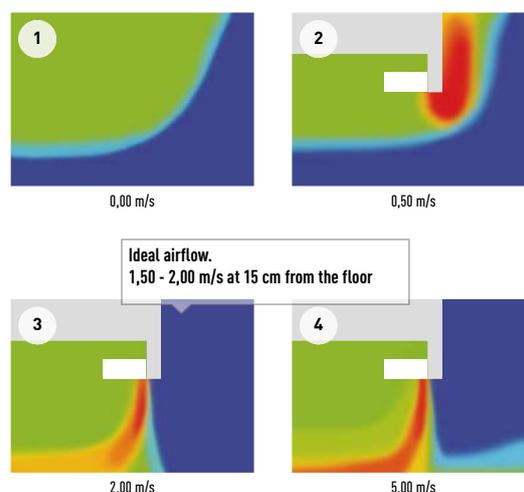

- Speed selector (high and low) on the unit itself

Easy installation and maintenance.

- Easy installation
- Compact dimensions improve installation and positioning (Jet-Flow)
- Easy cleaning of grid without opening of the unit

Optimised airflow velocity

1. Energy losses, no air curtain installed
2. Too low velocity air curtain – air curtain not efficient
3. Optimum results with the Tekadood air curtain connected to Panasonic VRF
4. Too high velocity air curtain – considerable turbulence, energy lost to the outside, air curtain not efficient

R22 RENEWAL FAST, EASY TO INSTALL AND COST EFFECTIVE

¡An important drive to further reduce the potential damage to our ozone
It is often said that legislation is ruling our lives but sometimes it is there to help save
lives. R22 phase out can be described as one of these and from Jan 1st 2010 the use of
Virgin (new) R22 refrigerant was banned within the European Union.

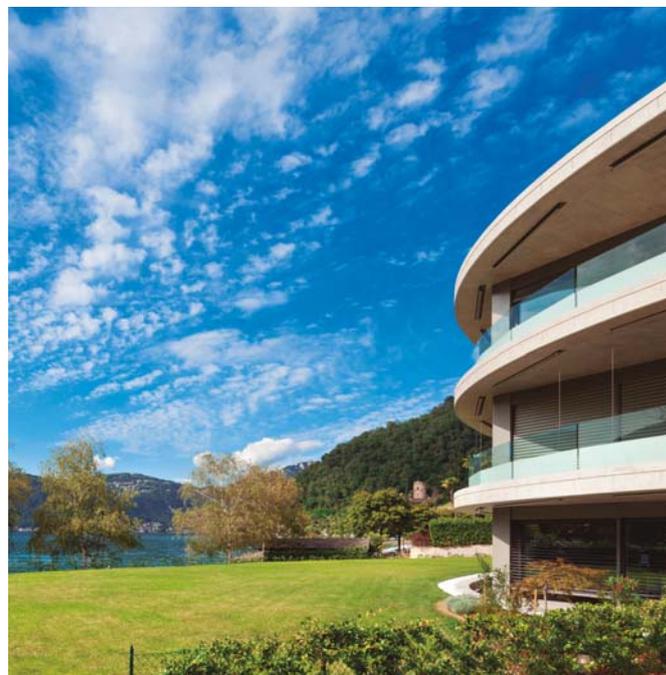

Panasonic are doing our part

We at Panasonic are also doing our part – recognising that all finances are under pressure at the moment. Panasonic has developed a clean and cost effective solution to enable this latest legislation to offer less financial impact on your business as much as possible.

The Panasonic renewal system allows good quality existing R22 pipe work to be re-used whilst installing new high efficiency R410A / R32 systems. By bringing a simple solution to the problem Panasonic can renew all Split Systems and PACi systems; and depending upon certain restrictions we don't even limit the manufacturer's equipment we are replacing. By installing a new high efficiency Panasonic R410A / R32 system you can benefit from around 30% running cost saving compared to the R22 system.

Yes...

1. Check the capacity of the system you wish to replace
 2. Select from the Panasonic range the best system to replace it with
 3. Follow the procedure detailed in the brochure and technical data
- Simple...

Why renewal?

Unique R22 Renewal from Panasonic: Fast, easy to install and cost effective.

- Panasonic refrigerant oil doesn't react to the most common oil types used in air-conditioning systems. This ensures the mix of oil does not damage the units. Therefore installations are easier

- All Panasonic PACi units can be installed in R22 pipings, no specific models are available
- Up to 33 Bar! When there is any doubt about the strength of the piping, the maximum working pressure can be reduced to 33 Bar with a setting in the software of the outdoor unit

Reuse of existing piping (renewal design & installation)

Notes on reuse of existing refrigerant piping.

It is possible for each series of PE1 / PE2 type and PEY2 an PZ type outdoor unit to reuse the existing refrigerant piping without cleaning when obtained under certain conditions. Make sure that the requirements under the section "Notes on reuse of existing refrigerant piping", "Measurement procedure for renewal" and "Refrigerant piping size and allowable piping length" will be satisfied in order to carry out.

Also, check the items with regard to section "Safety" and "Cleaning".

1. Prerequisite

- If the refrigerant used for the existing unit is other than R22, R407C and R410A / R32, the existing refrigerant piping cannot be used.
- If the existing unit has another use than air conditioning, then existing refrigerant piping cannot be used.

2. Safety

- If there is a hollow, crack or corrosion on the piping, make sure to install new piping.
- If the existing piping is other than capable of reuse of piping as shown in the flowchart, make sure to install new piping.

- In case of multiple operation, use our genuine branch piping for refrigerant R410A / R32.

A local supplier shall assume responsibility for the defects and hollows on the reuse of existing piping surface and recognition of reliability of the piping strength. There is no guarantee that we take responsibility for such damages. The operational pressure of the refrigerant R410A / R32 becomes higher compared to R22. In the worst case, a lack of compressive strength may lead to piping explosion.

3. Cleaning

- When the refrigerant oil used for the existing unit is other than the listed below, make sure to install new piping or wash it thoroughly before reusing it.
[Mineral Oil] SUNISO, FIORE S, MS
[Synthesized oil] alkyl benzene oil (HAB, parallel freeze), ester oil, ether oil (PVE only)

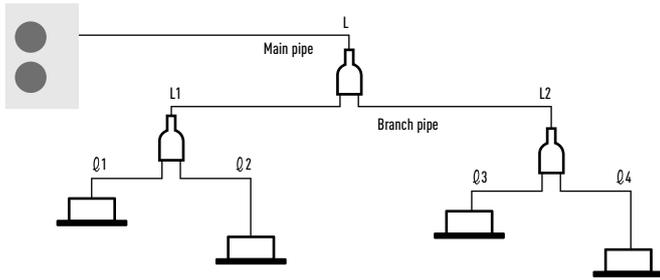

If the existing unit is GHP type, it is necessary to wash the piping thoroughly.

- If the existing pipes in the outdoor and indoor units remain disconnected, make sure to install a new piping or wash it thoroughly before reusing it.
- If the discoloured oil or residue remains in the existing piping, make sure to install a new piping or wash it thoroughly before reusing it. See "Deterioration Criteria for Refrigerant Oil" in table 3.
- If the compressor of the existing air conditioner has a failure history, make sure to install a new piping or wash it through thoroughly before reusing it.

When reusing the existing piping as it is without removing dirt and dust, inadequate piping could result a renewal appliance in failure.

Notes on renewal for simultaneous operation of multiple units

Only main pipe is applicable for using the different diameter size.
 In case of different diameter size for the branch pipes, a new installation work for a standard size is necessary.
 Be sure to use our genuine branch piping for refrigerant R410A / R32.

Notes on renewal for simultaneous operation of multiple units

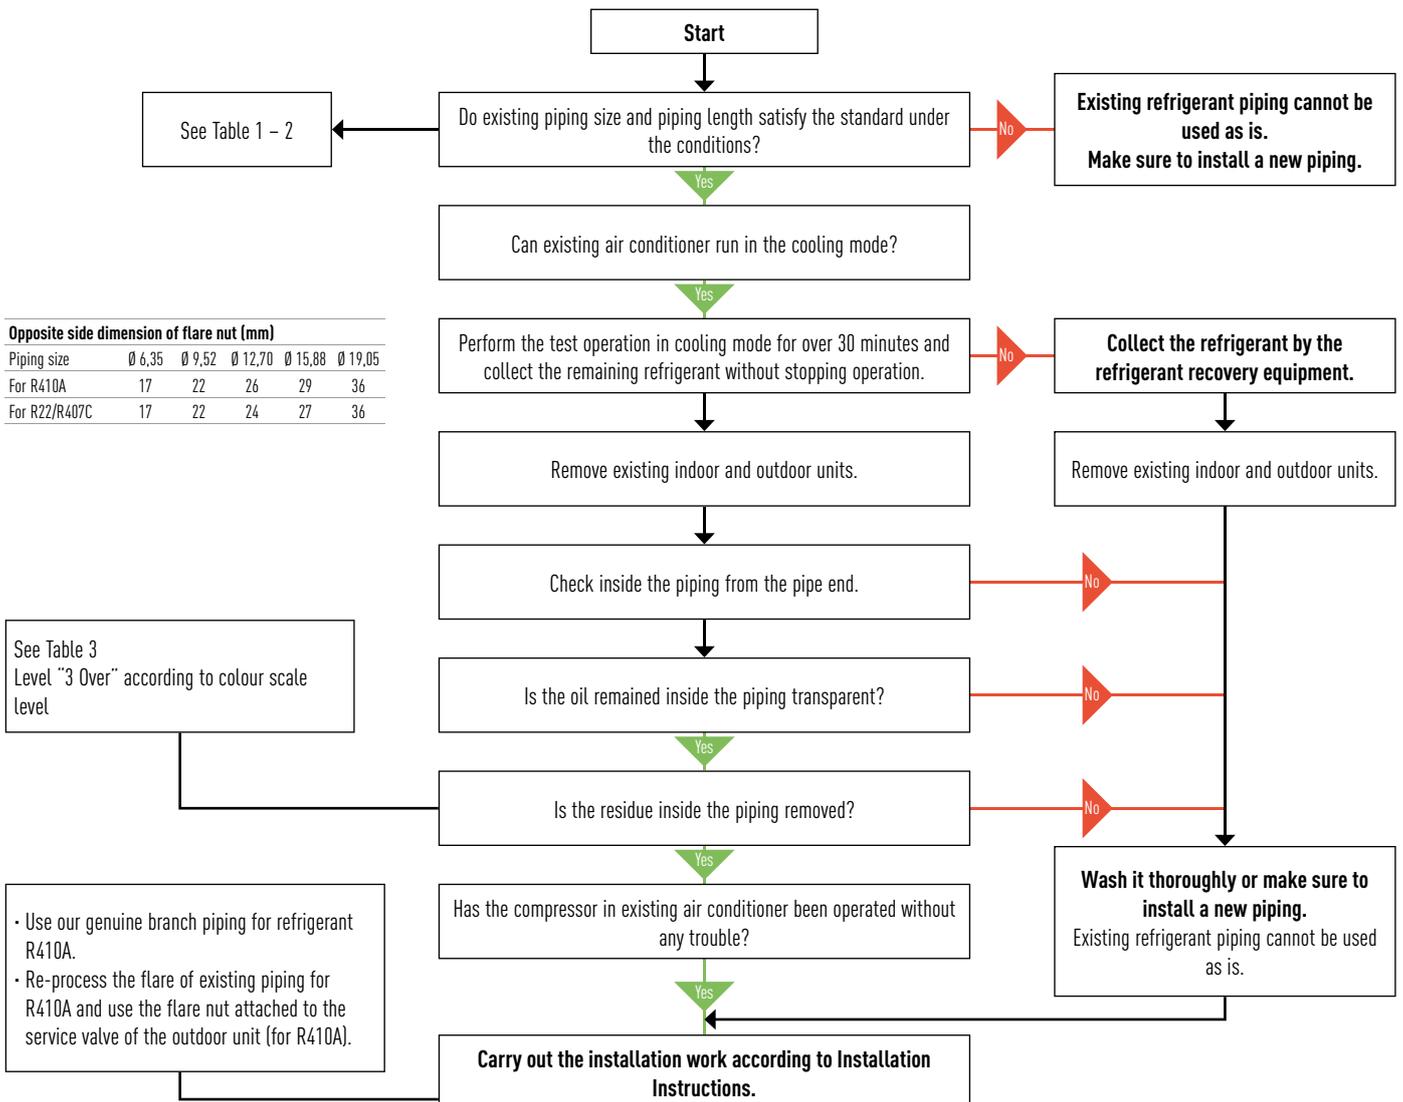

| Capacity class | Standard liquid pipe size | Standard gas pipe size |
|---------------------|---------------------------|------------------------|
| Type 50 | ∅ 6,35 | ∅ 12,70 |
| Type from 60 to 140 | ∅ 9,52 | ∅ 15,88 |
| Type 200 | ∅ 9,52 | ∅ 25,40 |
| Type 250 | ∅ 12,70 | |

- Only the main pipe L can be used among different diameter's existing piping
- Installation work as a standard size is capable for L1, L2, l1 - l4 piping
- Be sure to use our genuine branch piping for refrigerant R410A / R32

1. In case of single unit:
 It is not necessary to charge with additional refrigerant until the chargeless pipe length in the table 2.
 If the pipe length is exceeding the charge less pipe length, charge with additional refrigerant amount per 1m according to the equivalent length.
2. In case of simultaneous operation of multiple units:
 Calculate the refrigerant charging amount according to the calculating method of the standard piping diameter.
 As to the additional refrigerant charging amount per 1m, refer to the additional amount in the table 2.

Measurement procedure for Renewal

Observe the following procedure when reusing the existing piping or carrying out renewal installation work.
 Flowchart of existing piping measures criteria for PE1 Type and PEY1 type outdoor unit.

Opposite side dimension of flare nut (mm)

| Piping size | ∅ 6,35 | ∅ 9,52 | ∅ 12,70 | ∅ 15,88 | ∅ 19,05 |
|---------------|--------|--------|---------|---------|---------|
| For R410A | 17 | 22 | 26 | 29 | 36 |
| For R22/R407C | 17 | 22 | 24 | 27 | 36 |

See Table 3
 Level "3 Over" according to colour scale level

- Use our genuine branch piping for refrigerant R410A.
- Re-process the flare of existing piping for R410A and use the flare nut attached to the service valve of the outdoor unit (for R410A).

Refrigerant piping size and allowable piping length

Check if reuse of existing refrigerant piping is possible based on the following chart.

The standards other than this one (difference of elevation, etc.) are identical to the requirements of ordinary refrigerant piping.

Table 1 Reusable existing piping (mm)

| Material | 0 | | | | 1/2 H, H* | | | |
|-------------------|--------|--------|---------|---------|-----------|---------|---------|---------|
| External diameter | Ø 6,35 | Ø 9,52 | Ø 12,70 | Ø 15,88 | Ø 19,05 | Ø 22,22 | Ø 25,40 | Ø 28,58 |
| Thickness | 0,80 | 0,80 | 0,80 | 1,00 | 1,00 | 1,00 | 1,00 | 1,00 |

* It is impossible to reuse the size of Ø 19.05, Ø 22.22, Ø 25.4 and Ø 28.58 for material O. Change to material 1/2H or material H.

Table 2 - 1 Refrigerant piping size: 3,6 - 14,0 kW type (mm)

| Liquid pipe | | Ø 6,35 | | | Ø 9,52 | | | Ø 12,70 | |
|--|--|--------|----------------------------|---------------------|---------------------|----------------------------|---------------------|---------------------|---------------------|
| Gas pipe | | Ø 9,52 | Ø 12,70 | Ø 15,88 | Ø 12,70 | Ø 15,88 | Ø 19,05 | Ø 15,88 | Ø 19,05 |
| PE / PZH | Type 50 | ✗ | Standard 40 m (30 m) | ⊙ 40 m (30 m) | □ 20 m (15 m) | □ 20 m (15 m) | ✗ | ✗ | ✗ |
| | Type 60 Type 71 | ✗ | ▽ 10 m (10 m) | □ 10 m (10 m) | ▽ 30 m (20 m) | Standard 50 m (20 m) | ✗ | □ 25 m (10 m) | ✗ |
| Additional refrigerant charging amount per 1 m | | 20 g/m | | | 40 g/m | | | 80 g/m | |
| PE / PZH | Type 60 Type 71 | ✗ | ▽ 10 m (10 m) | □ 10 m (10 m) | ▽ 30 m (30 m) | Standard 50 m (30 m) | ✗ | □ 25 m (15 m) | ✗ |
| | Type 100 Type 125 Type 140 | ✗ | ✗ | ✗ | ✗ | Standard 75 m (30 m) | ⊙ 75 m (30 m) | □ 35 m (15 m) | □ 35 m (15 m) |
| PEY / PZ | Type 100 Type 125 Type 140 | ✗ | ✗ | ✗ | ✗ | Standard 50 m (30 m) | ⊙ 50 m (30 m) | □ 25 m (15 m) | □ 25 m (15 m) |
| | Additional refrigerant charging amount per 1 m | | 20 g/m | | | 50 g/m | | | 80 g/m |

How to see table definition (example):

In case of type 71, standard size is liquid pipe Ø 9,52 / gas pipe Ø 15,88,

There is a limitation to liquid pipe Ø 9,52 / gas pipe Ø 12,70 and to liquid pipe Ø 12,70 / gas pipe Ø 15,88,

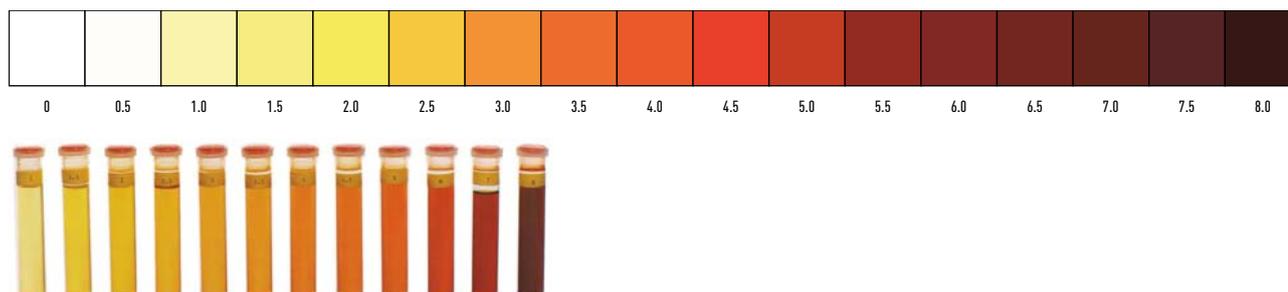

However, they are applicable for different diameter's pipes.

Table 2 - 2 Refrigerant piping size: 20,0 - 25,0 kW type (mm)

| Liquid pipe | | Ø 9,52 | | | Ø 12,70 | | | Ø 15,88 | | |
|--|----------|---------------------|-----------------------------|----------------------|---------------------|-----------------------------|----------------------|---------------------|---------------------|---------------------|
| Gas pipe | | Ø 22,22 | Ø 25,40 | Ø 28,58 | Ø 22,22 | Ø 25,40 | Ø 28,58 | Ø 22,22 | Ø 25,40 | Ø 28,58 |
| PE | Type 200 | ▽ 80 m (30 m) | Standard 100 m (30 m) | ⊙ 100 m (30 m) | ▽ 50 m (15 m) | □ 50 m (15 m) | □ 50 m (15 m) | ✗ | ✗ | ✗ |
| | Type 250 | ✗ | ✗ | ✗ | ▽ 80 m (30 m) | Standard 100 m (30 m) | ⊙ 100 m (30 m) | ▽ 65 m (20 m) | □ 65 m (20 m) | □ 65 m (20 m) |
| Additional refrigerant charging amount per 1 m | | 40 g/m | | | 80 g/m | | | 120 g/m | | |

- ⊙ Allowable
- ▽ Cooling capacity down
- Limited piping length
- ✗ Unallowable
- 50 m Maximum piping length
- (50 m) Charge less piping length in a single connection

Table 3 Deterioration Criteria for Refrigerant Oil

ACCESSORIES & CONTROL

Panels

CZ-KPU3
Normal panel for 90x90 Cassette PU2.

CZ-KPU3A
Econavi panel for 90x90 Cassette PU2.

CZ-KPY3AW
Panel for 60x60 Cassette size 700x700mm.

CZ-KPY3BW
Panel for 60x60 Cassette size 625x625mm.

Other Accessory

CZ-CNEXU1
nanoe™ X air purifying system for 90x90 Cassette PU2.

CZ-CENSC1
Econavi energy savings sensor.

Outdoor accessories

PAW-WTRAY
Tray for condenser water compatible with base ground support.

PAW-GRDSTD40
Outdoor elevation platform 400x900x400mm.

PAW-GRDBSE20
Outdoor base ground support for noise and vibration absorption (600 x 95 x 130mm, 500kg).

PAW-WPH7
Wind protection shield for 7,1kW Elite and 10,0 and 12,5kW Standard outdoor units.

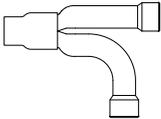

PAW-WPH9
Wind protection shield for 3,6, 5,0 and 6,0kW Elite and 6,0 and 7,1kW Standard outdoor units.

PAW-WPH8
Wind protection shield for U-200PE2E8A, U-250PE2E8A.

PAW-WPH10
Wind protection shield for 10,0, 12,5 and 14,0kW Elite and 14,0kW Standard outdoor units.

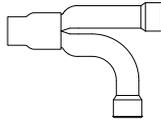

Branch Pipes, Header

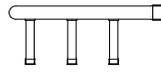

CZ-P155BK1
Branch pipe (capacity after distribution is 16,0kW or less).

CZ-P224BK2BM
Branch pipe (capacity after distribution is 22,4kW or less).

CZ-P680BK2BM
Branch pipe (from 22,4kW to 68kW).

CZ-P3HPC2BM
Header.

Plenums

CZ-DUMPA160MF2
Air Inlet Plenum S. .PF1E5B 100, 125 & 140.

CZ-56DAF2
Air Outlet Plenum S. .PF1E5B 36, 45 & 50.

CZ-90DAF2
Air Outlet Plenum S. .PF1E5B 60 & 71.

CZ-160DAF2
Air Outlet Plenum S. .PF1E5B 100, 125 & 140.

CZ-TREMIESPW705
Air Outlet Plenum S-200PE2E5.

CZ-TREMIESPW706
Air Outlet Plenum S-250PE2E5.

Individual Controls

CZ-RTC5B
Design wired remote controller with Econavi button and datanavi.

CZ-RTC4
Remote controller for maintenance setting.

CZ-RE2C2
Simplified remote control.

CZ-RWSU3
Wireless remote control for 90x90 Cassette PU2.

Controller for Hotels with Dry Contacts

PAW-RE2C3-WH
Stand-Alone with I/O White frame.

PAW-RE2C3-MOD-WH
Modbus RS-485 with I/O White frame.

PAW-RE2C3-MOD-WH
Modbus RS-485 with I/O White frame.

PAW-RE2C3-GR
Stand-Alone with I/O Grey frame.

PAW-RE2C3-MOD-GR
Modbus RS-485 with I/O Grey frame.

PAW-RE2C3-MOD-GR
Modbus RS-485 with I/O Grey frame.

Centralised Controls

CZ-RWST3N
Wireless remote control for Ceiling.

CZ-RWSK2
Wireless remote control for Wall mounted (and CZ-RWSC3).

CZ-RWSC3
Wireless receiver kit (need CZ-RWSK2 separately).

CZ-CSRC3
Temperature Remote sensor.

CZ-64ESMC3
System Controller with Schedule timer. Operation with various function from center station.

CZ-ANC3
Central On/Off controller, up to 16 groups, 64 indoor units.

CZ-256ESMC3
Simplified load distribution ratio (LDR) for each tenant. Intelligent Controller (Touch screen panel).

Centralised Controls. BMS System. PC Base

CZ-CSWKC2
PAIMS Basic software.

CZ-CFUNC2
Communication adaptor.

CZ-CSWAC2
PAIMS Consumption calculation control.

CZ-CSWBC2
PAIMS - BACnet interface.

CZ-CSWGC2
PAIMS - Layout display.

CZ-CSWWC2
PAIMS - Web application.

Centralised Controls. Connection with 3rd Party Controller

CZ-CAPDC
Serial parallel device controlling outdoor units, up to 4 units.

CZ-CAPC3
Adaptor for On/off control of external devices.

CZ-CAPBC2
Mini series parallel device controlling indoor units, maximum 1 group and 8 indoor unit.

CZ-CFUNC2
Communication Adaptor. Up to 128 groups. Controls 128 units.

VRF Smart Connectivity

SER8150R0B1194
Remote Controller Panasonic Net Con, RH, No PIR, R1/R2.

SER8150R5B1194
Remote Controller Panasonic Net Con, RH, PIR, R1/R2.

VCM8000V5094P
Panasonic R1R2 to Zigbee adaptor box No Brand.

VCM8000V5094G
(For Wave1) Wireless Zigbee Pro / Green Com card (required in case Wave1 wired product need to do MPM connection).

SED-WMS-P-5045
Wireless Sensors Wall motion sensor.

SED-WDS-P-5045
Wireless Sensors Door/window contact.

SED-CMS-P-5045
Wireless Sensors Ceiling motion sensor.

SED-CO2-G-5045
CO₂ sensor.

Accessories Interfaces

PAW-RC2-WIFI-1
Interface for Intesishome for PACi & ECOi.

PAW-RC2-KNX-1i
KNX Interface.

PAW-RC2-MBS-4
Modbus interface to control 4 indoor/groups.

PAW-RC2-MBS-1
Modbus Interface.

PAW-MBS-TCP2RTU
ModBus RTU Slave devices.

PAW-RC2-BAC-1
BACnet Interface.

CZ-CAPRA1
Domestic with CZ-CNT port integration to PACi and ECOi.

Accessories PCB

PAW-T10
All T10 functions.

PAW-T10V
All T10 functions + powermonitoring.

PAW-T10H
ON/OFF; Prohibit 5VDC & 230VAC.

PAW-T10HW
ON/OFF; Prohibit 5VDC.

PAW-PACR3
Redundancy of 2 or 3 systems; for PACi and ECOi.

PAW-SERVER-PKEA
Redundancy of 2 units PKEA.

Panasonic AC Smart Cloud

CZ-CFUSCC1
Panasonic AC Smart Cloud. Cloud internet control. Up to 128 groups. Controls 128 units.

Accessories Cables

CZ-T10
Cable for all the T10 functions.

PAW-FDC
Cable to operate external EC fan.

PAW-OCT
Cable for all option monitoring signals.

CZ-CAPE2
Option monitoring signals w/o Fan.

PAW-EXCT
Cable with force Thermo OFF/leakage Detection.
